

## Singhal Industries Pvt. Ltd. The Most Prominent Name In The Production of Flexible Packaging Bags

Singhal Industries believes in providing quality products and on-time delivery.

**Gujarat, Gandhinagar, Jul 29, 2021 ([Issuewire.com](https://www.issuewire.com))** - Singhal Industries Pvt Ltd started in 1987 in Gandhinagar, Gujarat, India; it is an ISO 9001:2008 certified organization issued by BSCIC Certification Pvt. Ltd. Singhal Industries believes in providing quality products and on-time delivery. They played a significant role in the flexible packaging industry and, over the years, diversified their business to offer

sharper focus to their critical business segments. They are operating for over two decades, reflecting in their strength and innovation that people used to transform the company and helped identify new opportunities.

As the most admired and learning packaging firm across the nation, Singhal Industries emerged as a significant global player. The firm offers a great environment to the workforce that promotes teamwork, enriches them, and strives to achieve the highest international standards regarding quality and service to the community.

### **Why Should You Choose Them?**

Singhal Industries has vast experience in several domains, including [FIBC bags](#), [Leno Mesh Bags](#), [PP Sheets](#), [HDPE Sheets](#), film products, and other polymer-based products. Their durable and flawless range of products with innovative designs, better quality control, and prompt delivery and logistics support. Besides, their expert team, worldwide presence, excellent technologies, machines, instruments, and lower cost with tremendous productivity made them stand out both in the national and international markets.

Singhal Industries emerged as one of the best as they set up exclusive core values:

- They focus more on customer satisfaction. Hence, they strive to offer superior quality products and packing solutions worldwide.
- They stand ahead in the competitive market and believe in innovations. Therefore, they bring new ideas and technologies to manufacture their products.
- They believe in maintaining a good and trustworthy relationship with their customers and employees.
- They consider their employees as their assets, and hence they celebrate their success with them, which motivates and encourages them.
- The firm believes in “Give Respect, Get Respect,” and hence they give utmost respect to their customers, employees, and stakeholders.

### **Excellent Quality Policy**

Being an ISO company, Singhal Industries offers their customer a wide range of flexible packing and lining products famous for their superior quality. They manufacture their products using quality raw materials. They housed a well-experienced and well-trained team of quality testers. They set up their quality policy to ensure to carry out their production levels complying with the Global Standards.

Their strict quality control policy enabled them to manufacture according to the international quality standards of flexible packaging and flexible lining products. Besides, they adopted well-defined steps for measuring quality control and quality testing from the beginning of the production process until manufacturing the products without any defects. They carry out their production by adopting the best-in-class technologies and equipment for quality testing. Singhal Industries’ main aim is to offer quality products. Therefore, they follow Total Quality Management (TQM) and Six Sigma Control Methodology.

### **Infrastructural Facilities**

Singhal Industries’ infrastructure offers categorized departments, including Human Resources and administration, production, research and development, purchase and sales, quality testing, marketing, logistics, packaging, delivery, and others that help smooth and efficient running of the firm. The firm

housed experienced teams of professionals for smooth running and controlling the departments. The well-equipped infrastructural unit combining with the well-trained department offers utmost satisfaction to their customers, as they offer the customers flawless products.

## The Products

Currently, Singhal Industries manufactures nine products. These include:

- PP Jumbo Bags
- PP Leno Bags
- PP Woven Bags
- Boop Bags
- PP Sheets
- HDPE Sheets
- HDPE T Rib Liner Sheets
- TPU Film
- Warning Tapes

Slowly and steadily, they are planning to expand their product range. Besides, the firm is already into exporting its products worldwide.

### *Let us have a brief look at some of their products.*

**PP Jumbo Bags:** FIBC is an eco-friendly product, as one can recycle them after expiry. Moreover, these bags save handling costs, as they are easy to carry due to integral lifting loops. They manufacture a wide range of FIBC bags as per customers' requirements, including single loop, double loops, four loops, U-panel, 4-panel, baffle bags, industrial clean bags, and several others.

**PP Leno Bags:** These bags are ideal for storing and transporting agricultural products and firewood. These bags help in keeping the products remain fresh and unmarked. The bags offer superior packaging options for the materials to sustain them for longer and maintain their durability.

**PP Woven Bags:** The PP woven bags are highly durable, have good strength, are flexible, and are versatile. Due to these features, it is ideal for packing and storing various essential food items like sugar, salt, seeds, fertilizers, different types of grains, rice flour, powder, spices, and other food items.

**BOPP Bags:** With incredible tensile strength, BOPP bags help protect items kept inside them from getting damaged. They are ideal for consumer products, pet foods, fertilizers, and animal feed. They are suitable for fragile packaging items.

**PP Sheets:** The PP sheets produced by the firm are economical materials, offering a combination of outstanding chemical, thermal, mechanical, physical, and electrical properties. These sheets are great for stationery products such as files, folders, and computer data binders, videocassette covers, food packaging, such as box fabrication, and many other industries.

**HDPE Sheets:** Singhal Industries specializes in manufacturing premium grade HDPE sheets with massive demand in the market. The sheets are resistant to shock, abrasion, impact, and temperature. These are ideal for using chemical flooring, transporting containers, lining jobs, geothermal applications, industrial floor lining, and spinning cans and packaging.

**HDPE T-Rib Liner Sheets:** The HDPE T-Rib liners are highly resistant to sulphuric acid coming from sewage tanks. Hence, industries use these pipes as additional films inside sewage RCC pipes that prevent harmful aggressive chemicals.

**TPU Film:** TPU films are an excellent choice for withstanding heat exposures. TPU film maintains structural integrity, proving its capabilities in handling varieties of thin gauge substrates and its ability to process difficult substrates.

**Warning Tapes:** Warning tapes come with a customized printed message on them that warns future excavators about the presence of underground utilities, including electric cables, fiber optic, telecommunications cables, gas pipelines, and water pipelines.
