

Technology which kills COVID-19. by collaboration of Artion & Energy Power Ltd

Delhi, New Delhi, Jul 8, 2021 ([IssueWire.com](https://www.IssueWire.com)) - The company Energy Power Ltd along with scientists i.e.co-founders Dr.Neeta, Shyam Vasantrao Raut have employed a method to make the world a safer and healthier place for COVID-19. The thought process that led to the development of the technology was the recurrence and mutation of Coronavirus which had put us in such a situation where the daily new reported COVID-19 cases have risen to 23 lakhs COVID-19, the largest reported by any country in any seven day period since the start of pandemic leading to pressuring our healthcare system causing shortage of oxygen supply and medicines.

With experts saying, the third wave is also going to soon hit us, preventive measures have taken the spotlight.

To prevent the spread of COVID-19, a method has been employed in form of a technology that dramatically reduces the concentration of airborne aerosols contaminants, neutralising viruses and bacteria, and wiping out infectious germs and viruses including coronavirus up to 99.95%. The aim behind this technology is to never let the world come to a halt and make it a safer place for future generations said Energy Power Ltd. Also, one of their motives is to give the next generation a better and safer world as with years there has been technological advancement but access to breathing the purest form of air is now considered a luxury. The technology generates similar ions as found in sunlight, thunderstorm, etc which actively cleans the air without producing any harmful by-products, bringing in outdoor freshness indoors.

Our Technology deactivates the corona COVID-19, its mutants, other harmful viruses, bringing the atmosphere to safe levels bringing the environment clean and safe.

Energy Power Ltd along with its scientist has been working day and night to make it a better place for the entire beings and to provide something back to mother nature.

In order to help us promulgate the technology, any kind of funding/donation is welcomed.
