

Thyroid Function Test Market Report 2021 | Size, Share, Trends, Analysis, Growth and Forecast 2026

New York, New York City, Jul 8, 2021 ([Issuewire.com](https://www.issuewire.com)) - According to the latest report by IMARC Group, titled, “[Thyroid Function Test Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)“, The global thyroid function test market exhibited moderate growth during 2015-2020 and expects the market to grow at a CAGR of around 6% during 2021-2026.

Thyroid function tests are used for measuring hormone levels in the blood. They aid healthcare professionals in diagnosing numerous diseases, such as thyroiditis, cancer, nodules, goiter, tumors, Hashimoto's, Graves', hyperthyroidism, hypothyroidism, etc. Some standard tests advised by doctors to evaluate thyroid function include thyroxine (T4), thyroglobulin, thyroid-stimulating hormone (TSH), triiodothyronine (T3), calcitonin, thyroid antibody, etc. Owing to the rising number of infants with medical conditions, such as thyrotropin receptor autoantibodies (TRAb), craniosynostosis, advanced bone age, etc., there is an increase in the demand for thyroid function tests.

As the novel coronavirus (**COVID-19**) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviours of the consumers globally, and our estimates about the latest market trends and forecasts, are being done after considering the impact of this pandemic.

Thyroid Function Test Market Trends:

Substantial growth in the automotive industry across the globe is driving the polybutadiene rubber market. This rubber is extensively utilized in the production of high-quality components in semi utility

vehicles (SUVs) and luxury vehicles to provide enhanced comfort to the user. Furthermore, the rising demand for advanced rubbers and chemical-resistant materials is bolstering the growth of the market. Liquid polybutadiene rubber is used in the manufacturing of elastomers, belts, shoes, hoses, rubber bands, coatings, adhesives, etc. Besides this, numerous product innovations, such as the utilization of bio feedstock for the production of synthetic rubber, are fueling the product demand. Several other factors, including growing expenditure capacities and elevating levels of industrialization, are anticipated to drive market growth in the coming years.
