Uttar Pradesh Dairy Market Industry Definition and Application:

Milk is a rich source of macro-and micro-nutrients like calcium, proteins, vitamins A and D,

carbohydrates, magnesium, zinc, etc. These nutrients provide various health benefits, such as strengthening bones, improving metabolism, lowering the risks of cardiac diseases, building the body's immunity against multiple diseases, etc. The dairy industry also utilizes raw milk to produce a wide range of dairy products like ghee, butter, condensed milk, cheese, desserts, yogurt, cream, etc.

Note: We are regularly tracking the direct effect of **COVID-19** on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Uttar Pradesh Dairy Market Trends and Drivers:

Inflating disposable income levels and the rising health consciousness among Indian consumers are primarily driving the growth of the Uttar Pradesh dairy industry. Moreover, the transformation of the industry from an unorganized to an organized sector is further stimulating market growth. Besides this, several regional key players are focusing on upgrading their networks of milk procurement to expand their consumer base. Furthermore, the growing availability of value-added products, such as cheese and probiotic drinks, is further augmenting the demand. Additionally, continuous technological advancements for extending the shelf life of liquid milk are also acting as an important growth-inducing factor. Apart from this, the introduction of several initiatives and schemes by the state and central government for improving dairy farming practices is expected to further propel the Uttar Pradesh dairy market over the forecasted period.
