

## Whalertoken Planning To Hit The Moon Real Soon

With the announcement of listing to three major exchanges, Whalertoken can be the right 100x token that investors have been looking for

**Aberdeen, Cleveland, Jul 9, 2021 ([IssueWire.com](https://www.issuewire.com))** - With the boom of cryptocurrency, we are seeing a number of tokens being released each day by the developers but not everyone is a safe investment for you. Needless to say, that one cannot be careful enough.

[Whalertoken](#) has a token structure that keeps your investment safe and not only that but it will also multiply it ten folds and even more sooner than you can expect.

With the [pre-sale](#) going on right now, there is much to be expected, and it has been a great success. But the cherry on top would be the listing of Whalertoken on 3 big exchanges that will be in 4 months and that would be just the perfect opportunity for everyone to enjoy a safe and growing investment opportunity who believes in crypto.

[Whalertoken](#) got secure fundamentals such as 5% of each transaction is distributed to the existing holders, the community is growing stronger by the day. A certain bump in the price is being expected out of these listings and with each listing, the trading volume will be growing exponentially, and that will allow existing holders to not only enjoy the best growth in their investment with token price being raised, but they will also be earning more tokens with each transaction and what can be better than that.

The chatter is skyrocketing on their telegram and twitter accounts and people are already very excited about the listing on these exchanges. That makes it pretty evident that it will be a great success and something big is going to happen with these listings.
