

Xpats, live Borderless. This is your new Community

Because moving to a new country should not be anything but a pleasant adventure

New York, New York City, Jul 21, 2021 ([Issuewire.com](https://www.issuewire.com)) - After more than a year since the pandemic changed our lifestyles and made us more digital than before, we have come to interact with the world in new ways. Between “home office”, “Homeschooling” and almost being able to deliver anything to your door, the possibility of changing countries became more doable. Countries like Barbados, Bermuda, and Anguilla opened their doors to all those who wanted to trade their home offices into beautiful beaches and work remotely from their paradise.

In the midst of traveling restrictions and opportunities to change countries, the bureaucracy of relocation did not facilitate the process of those who were looking for a change. Yet, the remote workers have been experiencing a two-figure growth over the past 2 years, according to a survey by US-based MBO Partners and Tech Monitor, and there is no sign of this trend slowing down.

[XPATS](#) -Live borderless is a project dedicated to making the lives of those on the move, easier.

It's an app-based cross-border platform to help the new generation of the global working community settle down wherever their new challenges lead them.

Co-Founder of XPATS, Roberto Monturiol assures, from his own experience: "Changing countries is never an easy process and after being an ex-pat myself, we wanted to create a project where people can feel like they have a safe island in the midst of change. Therefore, the vision of XPATS it's not only to provide a borderless banking experience but also give solutions with the warmth of home".

With this in mind XPATS – Live Borderless will accompany its members 24/7 in their financial life across new destinations besides offering support all along in their adapting journey. This means getting help with what can be a never-ending juggling across banking jurisdictions in different systems, as well as not having any access to credits for a long period of time.

XPATS believes in a world beyond borders and is committed to making living abroad easier, more meaningful, and enjoyable while making the experience smart and cost-efficient, as well as creating a community that will make your experience hassle-free and will help you get “home” faster than you think.

XPATS is currently featuring some attention in Europe and will be pitching the project during the F10 Incubator and Accelerator Demo Day with a live show on the 22nd. To join this event for free, go to this link: <https://lnkd.in/gT72KyR>
