HP Printer Tech Support

New York, New York City, Aug 18, 2021 ([Issuewire.com](https://www.issuewire.com)) - HP printers are known for their economical prices and accessibility. HP operates in more than 170 countries, so you can rest assured that you can buy your next HP printer in your local markets and the internet by visiting HP's official website. To begin your journey with HP printers, head over to **123.hp.com/setup** and follow our HP setup guide to download and install your HP printer drivers today.

Set Up an HP Printer for the First Time Using the Link 123.hp.com/setup

Before downloading the printer drivers using the link 123.hp.com/setup, you have to set up your printer and make it run for the first time. To begin the setup process, please follow the steps given below.

- **Remove** the printer from the box.
- **Remove the plastic wrap** from the printer.
- **Recycle** the packing materials.
- **Insert** the power cable's one end into a wall outlet & the other end into the printer's rear end.
- **Turn on** the printer.
- **Open the ink cartridge** access door & wait till it becomes idle.
- Do not touch the black plastic on the cartridge.
- **Unbox the ink cartridge** and remove the protective material.
- **Insert the ink cartridge** into its slot.

- Keep pushing the ink cartridge until it snaps into place.
- Repeat the same steps and insert all the other ink cartridges into the printer.
- Once installed by using the link **123.hp.com/setup**, close the ink cartridge access door.
- **Take out the input tray** and raise it.
- Now, open a pack of paper and load up to 60 paper sheets into the paper tray.
- Carefully slide the stack of paper down until it stops.
- Your printer has now been installed. Please proceed with downloading the drivers for your printer through **123.hp.com/setup**.

Download and Install the HP Printer Software on a Windows Computer Using the Link 123.hp.com/setup

Follow the steps given below downloading and installing HP printer software on your Windows PC and laptops.

- **Power ON** your computer.
- Ensure you have got a high-speed internet connection.
- Now, open Firefox, Microsoft Edge, Google Chrome, or any other web browser currently installed on your computer.
- Check if the internet is functioning or not. Go to google.com to see if you have an internet connection.
- If the Google search page opens, you can continue with the setup process.
- Type **123.hp.com/setup** in the top URL bar and press Enter.
- Before you moving forward, please ensure that your printer is turned ON.
- Once you're on the website, select your country from the bottom-left corner of the screen and click on the **"Install HP easy printer."**
- Automatic download will start.
- Wait for the download to complete. The setup file is only 9.43 MB, so it won't take more than 2 minutes for the download to complete.
- Once downloaded, open the Windows Download Folder and **double-click** on "HPEasyStart_13_1_5.exe."
- On the installation screen, select **"Agree & Install."**
- Follow the standard installation procedure and complete the installation using the link 123.hp.com/setup.
- Once the program has been installed, restart your Windows computer for the new printer settings to take effect.

Download and Install HP Printer Software on Mac Computers Using the Link 123.hp.com/setup

Follow the steps given below downloading and installing HP printer software on Mac computers and laptops.

- **Power ON** your Mac computer.
- Ensure to be logged in with the administrator ID.
- Open Safari Browser or any other browser currently installed on your computer.
- Type google.com and check if the internet is working.
- If it's working, type 123.hp.com/setup in the top search bar and **press Enter**.
- Wait for the page to load.
- Once it is fully loaded, select your region (country) from the screen's bottom-left corner and click on the **"Install HP Easy Start"** button.

- This will start the automatic download.
- **Save the installer file** in the download folder.
- Once you download it through **123.hp.com/setup**, open the download folder and double-click on the installer.
- As a Mac user, enter your Mac administrator details for installing and removing applications.
- **Enter your Mac ID** and password.
- Follow the standard installation instructions and complete the installation.
- Once installed, restart your computer and move to the next step.

Connect an HP Printer to the Ethernet Using the Link 123.hp.com/setup

Follow the steps given below for establishing an Ethernet connection for your new HP printer.

- **Power on** the computer.
- Before moving forward, please ensure that the paper is loaded in the paper tray.
- **Remove any tapes or protective material** from the Ethernet port of the printer.
- **Clean the Ethernet port** and connect your printer to it using the Ethernet cable.
- **Power ON** the router.
- Make sure your computer or your current device is connected to high-speed internet. (probably broadband)
- Power on your computer.
- **Open** Google Chrome browser.
- You can use Firefox, Safari, or any other web browser currently installed on your computer.
- Type **123.hp.com/setup** in the URL bar and navigate to the printer support page.
- **Type your printer model name and number.**
- Now, you'll see an automated window recommending you the best software for your smartphones and computers for using your HP printer.
- **Download and install** the HP printer driver.
- Alternatively, you can install the HP Smart App.
- Allow the driver installation using the link 123.hp.com/setup.
- Once installed, restart your computer.

Wirelessly Connect Your New HP Printer

Follow the instructions given below for connecting your HP printer to a wireless network.

- **Power ON** your computer and go to the printer control panel.
- Now, **select the "Restore Network Defaults"** options. You can find this option under the Wireless > Settings > Restore Settings menu.
- If your printer does not have a touch control panel, you can use the control panel buttons to navigate these settings.
- **Press & hold the Wireless button & the Cancel** button.
- Keep pressing the buttons until you see the power lights blinking on the screen.
- If you have any latest HP printers or HP Envy series Printer like the HP Envy 6000, Pro 6400, DeskJet Plus IA 6000, and 6400 All-in-One printers, try holding the wireless button for about 5-10 seconds until you see the side LED blink in purple lights.
- For HP Tango users, the wireless button will be there on the backside of the printer.
- **Press & hold the "Wireless"** button for at least 5 seconds until you see a blue light blinking on the printer's front. If the printer restarts a few times, don't panic because it's part of the operation.

- Now, **reduce the connectivity distance** between the printer and the Wi-Fi router by placing the devices near each other.
- Before moving forward, **ensure the availability of paper in the main tray** of the printer.
- **Press the power button** on the printer.
- **Open the HP Smart app.**
- You can download & install the HP Smart app via this link – 123.hp.com/setup.
- You can use the HP Smart app on Windows, Macs, Android, and iOS devices.
- Follow the on-screen instructions to complete your HP printer setup on your preferred device.

FAQs

Where is my HP printer assistant?

It's super easy to locate your HP printer assistant. To start, locate the Printer Assistant on the desktop and click on it. After that, search for your printer's name to open your HP printer assistant.

How do I get my HP printer to scan?

First, check if the printer supports scanning. Now, save the PDF documents in a single file and click on Format. Finally, send the file to email and change settings accordingly to scan documents with your new HP printers.

How do I scan PDFs with my HP printer?

Power ON your device and go to the Scan Settings and Preferences. Now, you need to access your scanner PDF settings. Click on "Scan Documents" and click on the arrow next to the "Scan to" option. Finally, click the down arrow and select "PDF (*. Pdf)."

How do I troubleshoot my HP printer?

To troubleshoot your new HP printer, download and install the HP printer and Scan Doctor application via 123.hp.com/setup. Open and run the "HPPSdr.exe" file from the download folder and run the application. Finally, select your printer from the list and click on "Fix Printing."
