

Azam H. Rizvi, MD, Radiologist with Larchmont Imaging Associates LLC

Get to know Radiologist Dr. Azam H. Rizvi, who serves the population of Mount Laurel, New Jersey.

New York, New York City, Aug 9, 2021 ([Issuewire.com](https://www.issuewire.com)) - Dr. Rizvi currently practices with Larchmont Imaging Associates LLC in Mount Laurel, New Jersey.

At Larchmont Medical Imaging, your good health has always been their primary concern. Today, this is

truer than ever. Many people still need medical imaging tests during this challenging time. At Larchmont, they have taken many steps to make your next office visit as safe and comfortable as possible.

Additionally, he is affiliated with Virtua - Memorial Hospital of Burlington County, Inc, and Virtua West Jersey Health System. Their comprehensive health system exists for one reason – to better serve you. They are proud to be your trusted neighbor, striving each day to connect you with what’s important to you, whether that’s wellness and prevention, experienced specialists and life-changing care, or something in between. They are your partner in health, always here for you, to build a healthier community.

Specializing in the field of diagnostic radiology, Dr. Azam Rizvi evaluates the results of medical images. These may include X-rays like CAT scans or MRIs. Diagnostic radiologists may specialize in evaluating the results of a specific imaging modality, or in the diagnosis of a specific disease, such as cancer. Medical imaging techniques are typically used to diagnose and evaluate conditions like cancer or a broken leg.

In regards to his education, he graduated with his Bachelor’s Degree from Rutgers University followed by his Medical Degree from Robert Wood Johnson Medical School- UMDNJ in 1994. He then completed his residency at the Medical Center of Delaware followed by a Neuroradiology fellowship from the Thomas Jefferson University Hospital.

Radiologists use imaging to gather information about the structure and function of the human body that may be unavailable without surgery. They rely on penetrating radiation, such as X-rays, CT scans, and PET scans to diagnose diseases. They may also employ ultrasound and magnetic resonance imaging (MRI) scans.
