

## BIRDSWAP - The Most Decentralized Token In the Universe

BirdSwap offers a wide range of DeFi services to suit each Polygon/MATIC user's needs

**United Kingdom, London, Aug 15, 2021 ([Issuewire.com](https://www.issuewire.com))** - When it concerns the financial markets, liquidity is critical and is extremely important to control when it comes to cryptocurrency's tokens and their security. It is also required for an exchange to function. Liquidity providers receive Liquidity Pools tokens, which provide various perks, including a discount on trading fees and access to many Polygon Matic goods. With Bird swap tokens and by connecting via Binance Smart Chain while availing use of its ample liquidity, BirdSwap overcomes Polygon's liquidity problem.

BirdSwap is an AMM that focuses on exchanges. BirdSwap provides several services such as swapping/Trading that support decentralized trade mostly on Polygon/Matic Network and help other Polygon projects manage their liquidity issues. In addition, BirdSwap provides a diverse set of Defi facilities that will undoubtedly meet the needs of any Polygon/MATIC user.

Recently due to the proficient working of Birdswap token, \$BIRD get an official listing on <https://julswap.com/#/swap/0xdfaad3733089c3cb2f053e8ac6c9f746a74f99a2> having 18 decimal points and a supply of 100,000,000 BIRD tokens.

Birdswaps officials warn their investors to be cautious of scammers and fake contracts. The official Birdswap social media and wallet are available on only this link: [https://drive.google.com/file/d/1yqvVCpsu0Jsrw86X6-t9kVUqj3pD6ca\\_/view?usp=sharing](https://drive.google.com/file/d/1yqvVCpsu0Jsrw86X6-t9kVUqj3pD6ca_/view?usp=sharing). Wallet A to Z regarding Birdswap token is soon to update.

Pools for Staking is a platform where buyers and investors can bet on \$BIRD and earn money while users can have their rest. It also yields farming with a high APR and low risk. In addition, users that have provided liquidity can stake their LP tokens in the farm to obtain an extra \$BIRD.

Upon launch, 50% of the entire Bird would be reserved to the black hole address. A bird will be charged 6% of each transaction by the smart contract. 2% of the cost will be added to the DEX's BIRD liquidity pool, 2percent of the total will then be transferred to the DAO governance pool, and the balance will be dispersed proportionally to all bird holders. Because the black hole location has the greatest BIRD allotment, the black hole will bear the brunt of the transaction costs. As a result, Bird permits Token deflation.

Basic Birdswap Token Multi-Mining works in the systematic step that ensures the security of investors' money. To begin auto-compounding mining and obtain the Birdswap token, investors must first stake the capital. Then, allow Birdswap token to join the liquidity pool, so they will get BIRD. Next, invest Birdswap token in drawing an NFT card after that. Finally, risk Birdswap token to get BIRD.

The Birdswap coin is also compatible with the Cross-chain Smart Pool. Ethereum, Solana, and OKExChain, will all be integrated into Bird Finance in the future. However, the smart pool will search for high-quality pools across chains, offering customers a cross-chain portfolio that allows them to earn more money. For further information, investors can obtain details from: <https://bscscan.com/token/0xdfaad3733089c3cb2f053e8ac6c9f746a74f99a2>.

To learn more about the services and benefits Birdswap token can provide to its investors in terms of cryptocurrency, anyone can easily access the basics on <http://birdswap17.org> and <http://birdswap.co>.
