

Bruce L. Feldman, MD, Internist with FeldMed

Get to know Internist Dr. Bruce L. Feldman, who serves the population of New York.

New York, New York City, Aug 10, 2021 ([Issuewire.com](https://www.issuewire.com)) - Dr. Feldman decided to start his own concierge medicine business in 2009, in which he likes to focus on direct patient care while eliminating the red tape of insurance and bureaucracy of a hospital setting. He focuses on internal medicine, with a special focus on heart attack and stroke prevention. By providing a specific care plan for each patient, Dr. Feldman is able to give patients the direct care they need.

FeldMed is Dr. Bruce Feldman's own blend of many different disciplines that promote healing and prevent disease. Unlike the variety of disciplines and schools of thought with names as confusing as Alternative Medicine, Functional Medicine, Integrated Medicine, Regenerative Medicine, and even

Western and Eastern Medicine, Dr. Feldman pulls together what he feels are the best parts of each to create a practice that is singular in its approach.

After decades of delivering conventional medical care, it became clear to him that to be truly healthy requires a combination of some of the oldest medical traditions with some of the newest in technology. FeldMed is not your mother's doctor's office. It is, in fact, a unique brand of medicine, incorporating the most important approaches from around the world to give you personalized medical care with an opportunity for limitless healing.

Personalized medical care is the only way healthcare should be delivered. It is not the current standard. Your experience with FeldMed is an unhurried, attentive examination of all things relevant to your overall health, in a location and at a time that is convenient FOR YOU, THE PATIENT - be it your home, office, or elsewhere. Using advanced technologies, some of which are not widely available, information becomes available to aid in redirecting you toward a more optimal health path. FeldMed is not for everyone - we don't want to be treating patients, we want to engage with patients on their health and wellness journey, assisting and steering them toward their best selves. Nothing happens without a level of commitment toward self. With that, extraordinary things are possible.

His Specialties include Overall Health Improvement, Regenerative Medicine, Heart Attack and Stroke Prevention, Concierge Medicine, Urgent Care, Housecalls, Quality Management, Outcomes reporting, Disease Management, utilization management, documentation, and coding, skilled nursing facilities, and care management.

He was educated at Temple University and continued his studies with an internship at the University of Maryland, Baltimore VA Hospital. Later he completed a residency at Good Samaritan Hospital and is board certified by the American Board of Internal Medicine. He is a professional member of the American College of Physicians and the American Academy of Private Physicians.

Dr. Feldman attributes his success to his desire to offer patient-centered care by listening to his patients and understanding them. When he is not assisting patients, he enjoys cooking, photography, and golf, as well as spending time with friends and family members.
