

# Chartered Operation During Pandemic

Developing Strategies to Distribute

**Delhi, New Delhi, Aug 7, 2021 ([Issuewire.com](https://www.issuewire.com))** - India had experienced the most destructive period in many years. Exposure to the virus in the second wave of the pandemic completely destroyed the health sector. At such a critical point, about 40 countries came to the rescue. India was well equipped with all the necessary medical equipment, oxygen cylinders, PPE Kits, Sanitizers, masks, oxygen concentrators, oxygen cylinders, oxygen systems, ventilators, all of which were transported by air and road.

AWL India was busy developing strategies to distribute them as efficiently as possible. The only challenge lies in the path of the [supply chain](#) companies so that the primary health centers, community health centers, urban health centers get the vaccine supply that is for an immediate need to fight the disease.

The Indian Air Force and airlines team carried out major operations to ship the key medicines and medical amenities to India. SpiceJet, IndiGo, Blue Dart played an important role. During the pandemic, SpiceJet Boeing 737 delivered 700 oxygen generators from Guangzhou, China, and IndiGo did the same with their Airbus A320. Qatar Airways Boeing 777F aircraft transported personal protective equipment and medical supplies such as oxygen cylinders, oxygen concentrators to metro cities like Mumbai, Delhi, Bangalore, Kolkata.

“Our AWL team is always on the frontline 24 hours a day, throughout the week to strengthen the [Indian healthcare cold chain](#) and resolve any issues that arise,” says Mr. Rahul Mehra, the CEO, and Founder of AWL India.
