Market Drivers

- Increase in some premature babies has driven the global Clinical Nutrition market.
- According to the World health organization (WHO), an estimated 15 million babies are born preterm each year, and the number is expected to rise in the coming years.
- According to WHO, across 184 countries, the rate of preterm birth ranges from 5% to 18% of babies born, more than 60% of preterm births occur in Africa and South Asia.
- In 2017, the U.S preterm birth rate has increased by 10%.
- According to the National Institute for Health and Welfare, out of 1,000 premature infants, 44 die before the age of one, due to the insufficient nutrients to the infants.
- The intolerance of milk-based products and stringent government regulation for clinical nutrition product might hamper the growth of the global clinical nutrition market

Industry Segmentation

By Product Type

- Infant Nutrition
- Enteral Nutrition
- Parenteral Nutrition

By Formulation

- Powder
- Liquid

Geographical Analysis

- Asia-Pacific dominates the global clinical nutrition market in 2017, and it is expected to grow in the forecast period, due to the high prevalence of malnutrition in children.
- According to WHO, in Asia, 35 million children were suffering from acute malnutrition, 83.6 million children were suffering from chronic malnutrition, and 17.5 million children are suffering from overweight in 2017.
- In 2017, Asia-Pacific accounts for 55% of chronic malnutrition, 46% of overweight hunger, and 69% of acute malnutrition.
- In 2017, in China 12.7 million children were suffering from chronic malnutrition.
- Hence, due to the high prevalence of malnutrition in China will drive the Asia- Pacific clinical nutrition market.
