With the theme of Critical consumption. She released her first Music Song and Videoclip Girls with those Curls, Remix.

„For me, this is super fulfilling because I have the opportunity to reach different people, different mindsets at the same time in different channels & ways. The Song is about self-care, self-appreciation and self love promoting looking & being different as something normal and positive. It is a Song Against mobbing and discrimination especially virtually this has become a huge issue that I cant oversee and now I am very grateful I was able to create an entertaining art to own my narrative and reach the younger generation trying to find love and belonging virtually. The article is more about the climate crisis

and how we could be questioning our consumer behavior and think ecology, economy, and social issues together. I kind of think that it is fascinating to reach hearts and I guess Art and Writing are wonderful ways of expressions and we are all different and we relate and react differently to different arts of communication or awareness and I always liked to touch people should via different of expressions and ARTivism as I like to say“

The idea of ARTivism (term consisting of ART+ Activism) worked out and it is the flag that Domitila Barros carries with her. here is a selection of links to interact with her.
