

GearTOP Design Launches Its Kids' Line: Now The Whole Family Can Stay Worry-Free Outdoors

Ontario, Oakville, Aug 27, 2021 ([Issuewire.com](https://www.issuewire.com)) - [GearTOP Design](#), the leading provider of affordable sun and wind protection for adults, with over [22,000 product reviews on Amazon](#), is gearing up to launch its kids' line. The announcement of the new line will be happening this coming September 2021, in time for the kids to be back at school.

A Canadian father and daughter duo, Greg & Patricia Kowalczyk created GearTOP with one mission in mind - to provide the highest-level of sun and wind protection in the market at an affordable price. They believe in their product so much that they offer [Lifetime Warranty](#).

Parents who have been looking for a way to protect their children from the harmful effects of the sun can now find high-level sun protection hats at a great price. Kids need as much sun protection as adults, if not more. This has given GearTOP a further reason to strengthen its position in this market by launching an affordable kids' line.

The company's products have been widely accepted because they are extremely durable and come at very reasonable prices. For instance, an adult-sized hat from GearTOP can be purchased anywhere between \$15 to \$25 depending on the model, which is less than the cost charged by many other brands.

With over 22,000 product reviews on Amazon, the father-daughter felt that it was the perfect time to expand their product line up. The company's founder is confident that the kids' lineup will prove to be just as popular as the adult line.

"We are excited about our children's line and believe that it will bring even more value to our regular and future customers," said GearTOP's co-founder, Patricia Kowalczyk, who also added:

"We see a great lack of high-quality sun protection hats for children, sold at affordable prices. We want to provide high levels of sun protection and make them accessible to everyone. UPF 50+ is the highest level of sun protection for any fabric, our children's hats all use this fabric, and without compromising quality, we always keep our prices as low as possible."
