What is Leawo Video Converter?

[Leawo Video Converter](#) specializes in converting Video to a wide range of file formats that can be seen from TV to mobile devices. This video conversion software can read and write almost any file type we are looking for.

There is a reliable list of tools in Leawo Video Converter to manipulate your videos, the important one of which is the pre-programmed output configuration file. These profiles allow you to choose from 25 different file formats, so you shouldn't run into any trouble. It also offers more than 100 device optimization profiles, covering everything from smartphones and tablets to gaming systems and set-top boxes. You should find a profile that suits your needs. After conversion, customers can even [play the](#)

[MKV file on Samsung TV](#) and solve problems when they try to [play the DAV file on the VLC player](#).

Besides, this program contains one of the best video editors we've seen during our review. It makes it very easy to trim, crop, and flip videos. You can also personalize the final video with watermarks and embedded captions in your output video. The Effects menu controls brightness, contrast, saturation, and volume. In addition, you can convert 2D video to 3D, but you should not expect Hollywood quality from this simple application. One thing that makes video editors better is if they include some interesting, pre-programmed filters for your videos. This may seem small, but the best programs have them, and they're more useful than you might think.
