IchthusNation has its own currency. The IchthusCoin, a decentralized token, is the digital currency designed exclusively for IchthusNation. IchthusCoin is the approved digital currency for use in the non-fungible token(NFT) marketplaces of the IchthusNation. The IchthusCoin symbol is FISH. The smallest unit of the IchthusCoin is the Ichthus Shekel. The Initial Coin Offering(ICO) of the IchthusCoin has an ICO distribution supply of 153 billion digital coins.

The ICO of the IchthusCoin unit value is \$ 1.44 USD per digital coin with an ICO market capitalization of \$220,320,000,000 USD (220 billion) equal to the Gross Domestic Product(GDP) of Egypt, Vietnam, Portugal, Czech Republic, Peru, and Romania. ICHTHUS is a Greek word meaning fish. It's a symbol that looks like the profile of a fish. However, it has a secret historical significance. In early Christianity, Ichthus was used as a secret Christian sign. The fish symbol became an easy way to circumvent the extreme persecution of Christians from the Roman Empire. The Ichthus symbol has been readopted by modern-day Christians as their symbol of faith. The symbolic IchthusCoin is the first global faith-based digital currency designed for the Ichthus Marketplace ecosystem, IchthusNation.
