Ij.start.canon - Canon ij setup wireless printer - Canon printer setup

Arizona, Phoenix, Aug 25, 2021 (Issuewire.com) - Canon IJ printers are popular for producing high-quality graphics and text prints, apart from this, it offers a variety of printing features that may push you to opt for the Canon IJ printers. If you have bought a new Canon IJ printer, you possibly find it tricky to set your printer up. For more assistance with Canon printer setup, visit **ij.start.canon**.

We have given the hassle-free instructions below to set up your IJ printer. By considering the given instructions, you can easily set up your Canon IJ quickly.

Prompts to Set-Up your Canon Printer

To quickly set up your Canon IJ printer hardware, you need to follow the directions listed below:

- The first step is to unpack your IJ printer carefully. Ensure that you put your new Canon IJ printer in a safe and dry place.
- Avoid placing your new IJ printer in extreme conditions as it can damage some parts of your IJ

printer.

- Now, connect one end of the power cord to your new printer, and connect another end to the wall power supply.
- Press the Power button placed on the front of your Canon printer hardware to power on your printer.
- After pressing the Power button, you will find that the red light immediately starts glowing.
- The red light indicates that your new Canon IJ printer has started functioning.
- Now, install the ink cartridges on your printer, and click on the ink cartridges.
- Then, insert at least 10 A4 paper sheets in the paper tray of your Canon printer.
- You can now start printing and scanning the documents.

Prompts to Set up Network Settings for Canon Printer Model

To make your Canon printer work properly, you need to set up the network settings accurately. Here, I'm going to discuss the step-by-step prompts on how to configure network settings really quick just by following some easy-breezy steps:

- Press the **"Menu"** button located on the operational panel of your Canon printer hardware.
- Next, you have to go to the **"Network Settings"** option displayed on your desktop screen.
- Then, choose the **"LAN settings"** tab and click on the **OK** button.
- Now, scroll down the list to locate the **"Wireless LAN Setup"** option on-screen.
- Now, you will get to see that all the nearby available networks in the zone are displaying in the search results. So, you have to pick the concerned wireless connection you wish to connect to.
- To set up the wireless connection for your new Canon IJ printer, you have to enter the correct user password for the preferred connection.
- Once you enter the right user password, click on the **OK** button.
- After completing the above process, visit the official website **ij.start.canon** and install the updated version of the printer drivers for your Canon IJ printer.
- Ensure that you have installed the updated drivers by going through the directions on-screen.
- After finishing the installation process, you can start scanning and printing the documents.

Prompts to configure your Canon IJ Printer on your device
