# James Feldkamp Helps to Protect Organizations from National, International and Cyber Threats

**Virginia, Arlington, Aug 17, 2021 (Issuewire.com)** - Commander James Feldkamp, US Navy Retired, is an expert in national, international, and cyber-security. He spent years defending our country as a U.S. Flight Offers, Counter-Measures Officer and spent time on the USS Midway in Operation Desert Shield and Desert Storm. He is also an educator, speaker, subject matter expert, and professor and Georgetown University where he developed and teaches a course on “Terrorism and Unconventional Threats.” His textbook, “Theory and Politics of Terrorism,” is used at many universities.

**James Feldkamp Focuses on Different Aspects of Terrorism:**

His background, education, and wartime experience earned him the role of subject matter expert in counter-terrorism and maritime security. He often speaks at national and international conferences.

James Feldkamp helps students understand the roots of terrorism and intervention tools to recognize and reduce terrorist actions. He also teaches students how terrorist groups use fundraising, politics, and media outlets to further their nefarious goals.

**Some of the topics that he regularly speaks and writes about include:**

· National and international terrorism

· Cyber-terrorism

· Information warfare

· Environmental terrorism

· State-sponsored terrorism

· Counter-terrorism

**Cyber-security Breaches a Major Threat for Business:**

One of the most feared threats today is the effect of cyber-security breaches by foreign and domestic terrorists. James Feldkamp warns businesses to be proactive in keeping their devices, Websites, and computers protected.

Feldkamp urges organizations to keep software and hardware up to date. IT managers should install the most recent versions of software products. They can recognize the latest cyber threats before they gain access to critical information. All devices should have anti-virus and anti-spyware installed. This will help detect cyber threats that got through the firewall.

**James Feldkamp Provides Help for Those That Have Experienced a Breach:**

It is nearly impossible to have 100% effective cyber-security. Feldkamp has some tips for those that have received a malicious threat.

If your computer system has is breached, follow these steps:

· Determine the source of the breach

· Have the IT expert determine how serious the problem is and possible repercussions

· Disconnect all computers from the internet to avoid hardware and software threats

· After the breach, update all computer systems and add new security protection to all computers and devices

· Change all passwords

· Provide insights to the entire team and put policies and procedures in place to reduce threats

*About James Feldkamp:*
