

JDHL Announces facility expansion to boost innovation & manufacturing of futuristic Medical Devices

Rajasthan, Jodhpur, Aug 28, 2021 ([Issuewire.com](https://www.issuewire.com)) - To our valued business partners:

Johari Digital Healthcare is on an exponential growth curve and, we are devoted to maintaining high-quality products & services that will benefit and support our valued partners. Observing a steady growing demand of our global business in MedTech and a strong will to provide the most efficient and cost-effective services possible, we are extremely delighted to announce the expansion of our Johari Digital Healthcare, adding a 20,000 sq ft Design & Engineering center (JEIC).

The Medtech industry is undergoing a massive transformation & India is emerging as one of the potential global medical manufacturing destinations. With the requisite focus on 'Make in India' and 'Skill India', Johari Digital Healthcare intends to align its innovation-backed approach with 'Design in India' fuelling efforts to become "**The trusted Design & Engineering center in India for Medical Device development and Engineering Solutions.**"

The JEIC center is well-equipped to provide support in areas of design analysis, hardware development, software development, testing, design quality, and end-user product delight. The innovation center supports futuristic Medical technology development by providing efficient Design & engineering skills like electrical/ electronic engineering, mechanical engineering, biomedical engineering, and software design & engineering. All the processes in JEIC are in compliance with international regulatory standards of ISO:13485 and US FDA.

The market size and enriched human resources including qualified engineers and scientists have strengthened India's position as a Medical Device Manufacturing destination. As a global MedTech Manufacturing company, Johari aims to drive progress in innovation and devise impactful solutions with proven clinical and economic value as the basis of its offerings and value proposition.

With added space and resources, we pursue zero side effects, zero-defect & 100% quality in our products & services. Our mission involves manufacturing safe, effective, affordable & quality medical products that enhance the quality of life.
