

Josna Foundation is Now One of The Most Potential Charities in Bangladesh.

Bangladesh, Rangpur, Aug 28, 2021 (Issuewire.com) - A few colleges, universities, and medical college students have set up a charity and service, a nonprofit organization called Josna Foundation in Nageshwari, Kurigram. In October 2020, at the call of Mahmudul Hasan, with the promise of standing by the people in the ongoing Corona epidemic, Abu Jakaria founded the organization with some associates. Although at first, their goal was to stay with the people in the Corona epidemic with rice and

pulses, later they started working on the 4 basic human rights such as food, clothing, education, & treatment. In just 1 year, the organization seems to have reached a new milestone.

In Corona epidemic delivery of food, rice pulses, medical allowances, installation of tubewells in mosques and madrasas, provision of livestock (goats) to poor and helpless people, distribution of blankets among the cold-stricken, tree planting along empty roadsides, distribution of school bags among meritorious and pious students, Giving notebooks and pens among the talented children is one of their daily new events.

In this regard, the founding president of the organization Abu Jakaria said, we have always been by the side of the people, we are and will be InshaAllah. "We want to conquer the world with love," he said. I don't know how much we have been able to do but we are going to do a lot in the future. We will always be by the side of poor, helpless people InshaAllah. "If we get the cooperation of the people, insha'Allah, we will start working all over the country and if possible, we will also start working outside the country," he added. For this, he has sought the cooperation of all.

The organization is moving forward at a great pace. They seem to have reached a new milestone in a very short time.
