

## Looking For Construction Permit? Bedrock Resourcing Is The Largest Atlanta Permit Expeditor For You

From initial permits to the completion of the projects, Bedrock Resourcing is always with its clients.

**California, Los Angeles, Aug 31, 2021 ([IssueWire.com](http://IssueWire.com))** - Bedrock Resourcing has come up as the largest Atlanta permit expeditor in not just Atlanta but all of Georgia. A full-service permit expeditor company, Bedrock obtains permits for its clients at record speed which might otherwise be behind a long queue at the permit office. It specializes in all types of permits in commercial and residential constructions including new builds, additions, remodels, renovations, build-outs, and a whole lot more. Bedrock's permit solutions are streamlined so as to complete and submit the permit on the client's behalf, no matter if it is the architect, homeowner, investor, etc.

Their management services in regard to seeking permits include researching the county and jurisdiction, including the state and local laws and amendments. They complete the forms on behalf of the client, get the authorizations, submit it and keep following up till the permit is received. They even take care of the approval process, handle necessary corrections and deliver the final permit to the location. As an added security measure, they also archive the permit at their location so as to have a backup in case of misplaced permits.

"It was never easy to reach the position we have acquired today. We are the biggest Expediter Building in Atlanta and have the most dedicated team to handle all sorts of obstacles and facilitate the procurement of the permits at the earliest and hand it over to the clients. We take care of Zoning

Approvals, Residential Permits, Commercial Permits, Film Permit Atlanta, Planning Commission Representation, Investor Services, and Design Team Coordination. We even attend the Administrative Hearings and UDC hearings for our clients. As is our motto, we are with you from the beginning till the end. Try us, and it will be the fastest permit you will ever have received", said the CEO of Bedrock Resourcing.

## About

Bedrock is a full-service permit expeditor company that focuses on commercial permits, residential permits, and a host of other approvals for clients. Whether it is a new build, a renovation, or remodeling, Bedrock takes care of every single permit required and delivers it straight to its clients.
