

Preus Chat App Brings Blockchain-based Instant eMessaging With a Secure Cryptocurrency Wallet

United Kingdom, London, Aug 18, 2021 ([Issuewire.com](https://www.issuewire.com)) - Instant messaging apps have become a significant part of human life in today's digitized era. It has also led to different cybersecurity threats for the users. The need for privacy, data security, and safety have increased the demand for crypto messaging app. Preus Chat App uses Blockchain technology to make sure the messages of their users stay end-to-end encrypted. The application has its independent source code to the operating system. It makes sure that any unauthorized person cannot open the app even after they are able to unlock the screen of the device.

Using p2p protocol, open-source, and end-to-end encryption, Preus Chat App offers flawless protection to the messages of their users. The application uses two-factor authentication that is backed by Blockchain technology. It is easy to access and a lot cheaper. The instant messaging app is much more secure and reliable compared to its contemporaries. The app is always coming up with new features using the latest Blockchain technology. Anyone can decentralize their messaging with this highly secure app.

Apart from high-quality security based on Blockchain, Preus Chat App offers voice messaging which is also encrypted. Voice messaging is available on both app and web platforms. The users can also share their screens with their partners or other third-party users, which will be encrypted as well. HD quality video calling with friends and family is available on the application. The app offers a built-in crypto wallet service that allows the users to store, transfer, and receive cryptocurrency. The funds will be heavily secured by the app. The multi-currency crypto wallet can never be monitored or disabled.

Preus Chat App is an end-to-end encrypted instant messaging app that is based on Blockchain technology. The users can also send and receive crypto payments alongside communication through the app. Their crypto wallet supports a wide variety of cryptocurrencies such as BTC, USDT, BCH, LTC, USDC, ADA, ETH, DOGE, and DASH. The app is available on both Android and iOS. To know more about their services, make sure to visit their website <https://preus-app.biz/>.
