

Techronus Jumpstarts Business Intelligence & Analytics Practice with Prevalent Offerings

Gujarat, Ahmedabad, Aug 3, 2021 ([Issuewire.com](https://www.issuewire.com)) - Techronus, a trusted and proven name in ERP, CRM, and Enterprise Solutions business, announced that it has invested in developing a full-service Business Intelligence (BI) and Analytics portfolio aimed at delivering greater business value to Enterprise clients.

Techronus has hired some of the top data scientists and visualization experts to oversee its BI Analytics practice particularly using PowerBI and Tableau platforms as they cover major BI Analytics market share. This new business offering will provide Techronus' clients a whole new way of bringing their scattered, unorganized massive data to life to make well-informed business decisions.

The following are some of the key takeaways of Techronus' BI and Analytics Solution Offerings:

- With safe and controlled self-service, all employees may discover, analyze, and provide data.
- All of your on-premises and cloud data is moved to a safe and powerful cloud solution.
- Faster insights into any data while ensuring data governance and security
- Providing all workers with mobile reports that look great on any device
- With the power of sophisticated built-in analytics, you can turn your data into intelligent action.

"As a part of our vision to catalyse sustainable digital transformations, the newly inducted BI and Analytics solutions will prove to be a game-changer since they bring in unmatched levels of proficiency, especially for the top executives. That's what will fuel tomorrow's enterprises," says Ketul Sheth, Director of Business Operations at Techcronus.
