

A New Cervical Plate Instrument Set Has Been Added by Siora to its Spinal Implant Category

This affordable instrument set will make its mark in the orthopedic device industry

Delhi, New Delhi, Sep 6, 2021 ([Issuewire.com](https://www.issuewire.com)) - Spinal injuries are serious, and they generally occur as a result of high-impact trauma like automobile accidents, contact sports injuries, and falling from a height. Sometimes, they are severe enough that only the surgery remains the last option left for the treatment. For surgeries in the spine, spinal implants are used. One of the subcategories of spinal implants is cervical implants, and they are intended to be used for the stabilization and decompression

of the neck. These implants are either used from the front or back of the spine.

Whether cervical implants or other [orthopedic implants](#), they often require specific instruments during implantation. Siora Surgicals Pvt. Ltd. has added a cervical plate instrument set to its AURASPINE category of spinal implants. This set includes a huge range of instruments, and some of them are:

- Bone curette straight 3.0mm, length 265mm
- Straight probe
- Maker impactor
- Rod bender – length 170mm
- Drill guide
- Plate holding forceps
- Self-holding sleeve
- Threaded distraction pin – 3.0mm X 60mm

These instruments present in the cervical plate instrument set are required for the correct placement of cervical plates in the body. Siora is a renowned manufacturer of this set and all other orthopedic devices that are used for the treatment of various orthopedic conditions.

The cervical plate instrument set is manufactured under the guidance of skilled professionals to maintain the highest quality standards and ensure utmost precision. Some of the instruments available in the set are specifically designed depending upon the size of the implant being used. For example, distraction pin installer for 3.0mm pin and distraction pin installer for 2.0mm pin. The company also manufactures these instruments and other implants in customized dimensions as demanded by the clients.

Operating for more than 30 years, Siora Surgicals is proud to be known as one of the oldest orthopedic implants manufacturers in India. The company serves hundreds of global clients by exporting its international standard quality implants to different countries. A huge range of orthopedic devices is being manufactured by Siora, and they conform to ISO 13485:2016 and ISO 9001:2015 standards. Siora Surgicals is a CE-certified company, and it owns an Indian FDA-approved production unit in the RAI District, Sonipat, Haryana. It is also counted among reliable [Orthopaedic Companies in France](#). Siora is also looking for distributors in different countries and offers quality OEM/contract manufacturing services.
