

EY and its Tax Outsourcing services are reimagining the client's operating models

Tax Outsourcing services

India, Delhi, Sep 30, 2021 ([IssueWire.com](https://www.issuewire.com)) - EY specialists can help you restructure your tax and finance business model to keep pace with the changing demands of regulation. It is difficult and costly to adjust your capabilities constantly. Instead, you can outsource our selected activities with our [Tax Outsourcing](#) and Finance Operate (TFO) system, leveraging EY's major technology, employee, and process investments.

EY understands how tax policy functions and how legislation is tailored to everywhere customers go in a dynamic economy. EY has a fantastic customer service team and links 54,000 EY tax professionals in more than 140 countries. In this regard, EY has a specialized customer services team. The outsourcing model helps customers retain control over their tax and finance strategy, policy, and responsibilities and helps them achieve all their duties for compliance.

The Microsoft Azure-powered EY Global Tax Platform (GTP) exchanges real-time information, automatically and digitally supports the process, enables customers to reconsider their tax and financing activities and results. It provides innovative technology through plug-and-play architecture that can improve risk management and fiscal governance through global vision and control. It can also enhance the quality of tax data, give high-value analysis, and uncover opportunities.

GTP also includes leading-edge tools for tax reporting that cover the global reach of customers. GTP supports them efficiently in addressing the global tax challenges and enables their finance function to focus on the best: planning value.

EY is dedicated to creating a better working world with higher corporate trust, sustained growth, talent development, and improved cooperation. Their solid commitment to serving many diverse stakeholders that rely on them to deliver quality and excellence in all they do.
