

In Home Personal Services Collaborates with VFI for a New Entrepreneurial Initiative for Veterans

United States, Illinois, Sep 21, 2021 ([Issuewire.com](https://www.issuewire.com)) - The Veterans Franchise Initiative (VFI) along with Operation Phantom Support and through an exclusive agreement with In Home Personal Services (IHPS) has developed a first-of-its-kind opportunity for Veterans in providing them with all the right resources for building a career as entrepreneurs. The goal is to meet the needs of those vulnerable, serve communities and build on an economy driven by the Veterans. Those that served to protect us, now stand ready to face a new challenge in changing the role and purpose of their lives as entrepreneurs.

Through VFI, a pathway to business ownership funded by private venture capitalists who deal exclusively in working with Veterans has built a pathway to becoming an entrepreneur. VFI has selected In Home Personal Services as an exclusive senior care provider franchise model for this national program. This opportunity will provide Veterans with the opportunity to become entrepreneurs with not only the support and backing of the IHPS proven business model but with the financial support that comes with VFI and its investors.

In every period of the Nation's history, the brave men and women of armed forces have answered the call. They have served with honor, integrity and performed their duties admirably. The Veterans, from every era, are the most recognized and honored individuals throughout the history of the country. Their service inspires generations, their actions have made the world a better place and their sacrifices will never be forgotten. This Nation is in need once again for these heroes, this time on a new frontline. The COVID pandemic has created not just a need in the healthcare system, but a need for the most vulnerable citizens of the country. The present economy is working towards rebuilding itself after the pandemic as the new initiative is looking to those who understand duty, honor, and service.

In-Home Personal Services, founded in 2004 is one the most premium home care systems offering high-quality services at affordable prices. They work with the clients along with their family members to allow them to remain living independently and safely in their own homes. They have built a reputation for helping clients maintain a high quality of life.

In-Home Personal Services has stood alone when it comes to creating individualized care plans based on our client's specific needs. They work primarily within independent living communities, allowing all clients to remain living independently and safely within their homes longer. They aim at matching the

perfect caregiver with your loved one's around-the-clock in-home care or individualized support care needs. This might include full-time in-home senior care or specific support such as bathing, companionship, meal preparation, or other helpful in-home care services.

Founded in January 2004 by Michael A. Collura working with his own mother to provide quality care to seniors who wished to remain in the comfort of their own home. According to him, "The best thing that we have, and the best part of what we have done, and the best way to describe a proven system, is in the people we have actually helped".

Some of the services offered by In Home Personal Services include personalized home care, specialized care, around-the-clock flex care, and additional valuable benefits. From in-home care, companionship care, live-in care, respite care, and more, the caregivers will be there for the residents providing the help they need while retaining the feeling of independence. The services are to help assist with activities of daily living (ADLs) as well as specialty care from Alzheimer's, diabetes, Parkinson's, post-surgical, stroke, and more. Caregivers provide the services to you or your loved ones according to your individualized needs. Around-the-clock home care support allows each individual to remain in the comfort of their home with the best care structure suited to each individual. In-Home Personal Services offer affordability without hourly minimums, no long-term contracts, and family flexibility. They also work with Long Term Care (LTC) Insurance and Veteran's (VA) benefits.

In-Home Personal Services is offering the best home care services for seniors. With the new initiative, they have entered a legacy that will allow Veterans to move back into their respective roles as entrepreneurs. For more information about their services, visit their website at <https://www.ihps.com/>.
