

# Magento 2 Multi-Vendor Marketplace Extension | Magento Marketplace

**Uttar Pradesh, Noida, Sep 30, 2021** ([Issuewire.com](https://www.issuewire.com)) - Striving to provide the best-in-class solution to the eCommerce community, [Ksolves' Magento 2 Multi-Vendor Marketplace Extension](#) has delighted the eCommerce industry. Its bespoke features reflect remarkable advancements that are enthralling the vendors. The queries which have poured in from various quarters of the industry have spoken volumes about the extension's popularity amongst those looking to invest in the potential eCommerce space. To further validate the impeccable extension, it is now live on the Magento marketplace!

A sneak peek into the Ksolves' Multi-Vendor Marketplace actually reveals the arduous work that has gone into its creation. There are tons of options for the owner to regulate the marketplace in the best possible way while the vendors enjoy a high degree of autonomy and customization features to attract customers to their respective stores. Overall, if implemented and promoted effectively, the extension can transform an average Magento store into a world-class Multi-Vendor Marketplace that can take on the might of the established marketplaces such as eBay, Alibaba, etc. The marketplace owner can expect explosive growth in terms of revenue and customers.

## Key Features Of The Ksolves' Magento 2 Multi-Vendor Marketplace

- **Vendor Management**

From managing unlimited vendor records to editing or updating vendor-related information, an admin has a lot of functionalities at his disposal for effective vendor management.

- **Independent Vendor Portal**

The vendors get a dedicated Vendor Portal to manage the homepage, profile page, category, type, orders, invoices, shipment, location details, and so much more.

- **Dedicated Home page for Vendors**

Every vendor has a dedicated Homepage. A vendor can include multiple banners. He/she can also customize the section titles & product count for each section like *Recently Added Products*, *Best Selling Products*, and *Most Discounted Products* to lure customers & enhance the store's awareness.

- **Customizable Vendor Profile**

A vendor has a customizable vendor profile. The Homepage, Banner, Logo, Profile information, Products page, and Contact Us details can be customized by the vendor. The vendor can add social media handles of Twitter, Facebook, Google+, Youtube, Instagram, Vimeo, and Pinterest easily. The sellers also have access to a *Heart* icon, which lets them see the list of their followers.

- **Next-Gen Commission Management**

Multiple rules with multiple conditions can be set up by the Admin to be applied on various commissions on several types of products. Commission rules can be applied based on

- All Vendors or a particular Vendor,
- Website,
- Vendor Group,
- Product Type,
- Date Range,
- Product Price Range/Bracket,
- Fixed Amount or Percentage,
- Product Filters such as particular product, product category, or any other field of the product table.

- **Commission Calculator**

This tool aids the admin in commission calculation before creating commission rules.

- **Earning Calculator**

Vendors can utilize this tool to calculate earnings before setting the price of the product.

- **Custom Product Attribute for Vendors**

Vendors can create custom attributes for their products and place a request to the admin for approval.

- **Locate Vendors on Google Map**

In the Map View & List View, one can use the Google Map to visualize the location for different vendors on the map. The customers have the option to utilize advanced search options- using the product name, vendor name, address, distance in miles, or km.

- **Favorite Vendor**

The customers can easily mark vendors as his/her favourite to get notified about new products or a price change

- **Sales Management (From Orders to Shipments)**

Vendors can manage their own order fulfillment process on approval from the admin.

- **Customer Complaint Against Vendor/Products**

The customers can report against a vendor/product if they find something wrong. A seller can be reported if there is any flaw, improper information, wrong pictures uploaded, etc. Similarly, if a customer detects fraud or there is any misleading information regarding a product, a product can also be reported.

- **Multi-Currency and Multi-Lingual Support**

The Magento 2 Multi-Vendor marketplace supports multiple currencies and languages.

Time will tell whether the latest Magento 2 Multi-Vendor Marketplace lives up to its expectations. However, the product is curated to perfection with equal attention to each segment and it's turning quite a few heads in the industry.
