

## NEUES FÜHRUNGSTEAM BEI DER BRIGHT Testing GMBH

**Baden-Württemberg, Sindelfingen, Sep 17, 2021 ([Issuewire.com](https://www.issuewire.com))** - BRIGHT Testing is a young company with technically motivated employees who have made it their mission to ensure a meaningful connection between a technical product and its test requirements in an individual work environment. With its headquarters in Sindelfingen, BRIGHT Testing GmbH has a central location in Baden-Württemberg.

At the beginning of the year, BRIGHT Testing GmbH gained two additional locations. Through the

integration of the partner, CTC cartech company services GmbH, BRIGHT Testing can now also offer a wide range of electrical and electronic test solutions as well as other assembly services. At the Böblingen location, BRIGHT Testing GmbH offers electronics and testing services in its own test facility.

The location in Esslingen acts as an assembly and diagnosis center. Here, test items are prepared for their test run with measurement technology and then dismantled, cleaned, and diagnosed.

For the successful implementation of these services at the 3 locations, BRIGHT Testing GmbH has put together a new management team. In the picture, you can see the new team from top left to bottom right.

Frank Mutz (Head of Technology at the Sindelfingen location, Head of IT), part of the team since 01.01.2017.

Sebastian Dressel (Head of Sales), part of the team since May 1st, 2017.

Christian Pfeleiderer (Managing Director), part of the team since January 1, 2017.

Daniel Duffner (Head of Engineering Electrics / Electronics), part of the team since May 1st, 2021.

Thomas Götz (Head of Operations Böblingen and Esslingen), part of the team since 01.01.2021.

With a total of 30 employees and 3 locations in Sindelfingen, Böblingen, and Esslingen, we are a growing company with a vision!

Together with our customers, we shape future mobility.

BRIGHT Testing Solutions. Services. Taylor Made.
