Prevost Construction Expands Services to New Markets

California, Solana Beach, Sep 3, 2021 (Issuewire.com) - Prevost Construction has expanded its footprint to new markets. The San-Diego based general contractor officially announced the acquisition of the Senior Housing Rehabilitation Division of Morrissey Construction Corporation (MCC). The new venture will provide construction services for senior housing renovation projects and multi-family facilities across California and nearby states.

With the recent acquisition, Prevost now employs over 60 dedicated industry professionals providing construction services across multiple segments for their valued clients. The combined team has already engaged on several projects in the affordable housing sector according to Director of Construction, Jimmer Lopez. MCC has built a presence in the industry over its twenty-year history in Oceanside, working with recognized non-profits like Retirement Housing Foundation and Elderly Housing Development & Operations Corporation.

“We are excited to join forces with MCC to bring our construction expertise to this segment of the industry. We will continue to Build Environments for People to Flourish, and look forward to serving the needs of the elderly occupants and low-income population within our communities, the state of California, and beyond” said Jamie Prevost, CEO of Prevost Construction.

To accommodate the growth, the company will relocate headquarters from Solana Beach to Carlsbad. In celebration of the first milestone in construction, Prevost hosted a company lunch on Wednesday, Aug. 18 for employees to tour the new property. The new office is expected to open at the beginning of 2022.

Located on Avenida Encinas, the 10,000 square-foot building will undergo a full exterior expansion with a new storefront and entry. Features include a full-transparent lobby to an outdoor patio, new creative office space with open workstations, private offices, a community-style break room with a shuffleboard table, and a golf simulator to entertain customers and employees.

About Prevost Construction:

Prevost Construction is a third-generation, San Diego-based general contractor specializing in all areas of commercial tenant improvements including life science facilities, creative office environments, building repurposing, high-end retail spaces, and food service. Since our founding in 1989, Prevost has provided expert guidance in the management of the construction process and carefully conducts each project from concept to completion with one goal in mind – an amazing customer experience.
