

Sun Bytes Solutions and Outpost24 Partner to Help Arizona businesses Reduce Attack Surface and Improve Security Posture

Arizona, Phoenix, Sep 8, 2021 ([IssueWire.com](https://www.issuewire.com)) - Sun Bytes Solutions, an Arizona-based MSSP, announced today that it will partner with Outpost24, the leading provider of full-stack cyber security assessment solutions on a cyber hygiene program called Lookout.

Organizations around the world, particularly small to medium size businesses, are challenged to keep up with rapidly evolving security requirements in the face of changing technology, skills shortage, and remote working. Outpost24 has developed an automated solution to assess cyber security exposure in all key technology assets – devices, networks, clouds, applications, data, and users. Assessing cyber security exposure across all assets, in the context of the attack path, offers a more holistic view of the attack surface and risk levels. The broader view provides better guidance for vulnerability prioritization of essential remediations and mitigations.

“Lookout is a truly unique product offering in the SMB space. A culmination of extensive testing in the enterprise cyber security market, Lookout was designed specifically for the small to medium-size business (SMB) with sensitive data such as law firms and medical practices,” suggested Jim Janusek, owner of Sun Bytes Solutions “With our partnership with Outpost 24 and their suite of cutting edge, cyber security products, Lookout is finally able to bring enterprise-grade security software and principles to the SMB

“We’re excited to partner with Sun Bytes Solutions,” stated Kai Muller, Global Sales Director for Outpost24 “We’ve been working hard to build a unique combination of cyber security assessment capabilities that address all key assets from infrastructure and cloud to applications and containers, as well as a business model that gives a competitive edge to VARs and MSSPs”
