

TripSpark Technologies To Present At Nemtac 2021

Industry Experts to Speak on Future Funding Model for NEMT

Iowa, Cedar Rapids, Sep 15, 2021 ([Issuewire.com](https://www.issuewire.com)) - TripSpark Technologies is excited to attend NEMTAC 2021. Two of their top executives, Joe Tovar and Kris Lyon, are looking forward to speaking about the future of NEMT funding models as they pertain to transitioning to value-based care.

Kris Lyon is the Senior Business Development Manager of TripSpark Medical. She has nearly 15 years of experience directly providing NEMT services, transitioning to the TripSpark team in March 2020. Her experience in healthcare and social work positions for her entire 30+ year career led to a passion for assisting older adults, people with disabilities, and those with low incomes to remain productive individuals in society.

Joe Tovar is the Director of Technology for TripSpark Medical, a market leader for software solutions in the NEMT industry. He has been working within the Trapeze/TripSpark family of companies since 2005 in various technical roles related to paratransit, school transportation, and for the past ten years, NEMT. Joe is most passionate about passenger access to real-time data, optimizing processes, and working with other thought-leaders in the industry.

They had this to say about their presentation:

"[It's] a look towards the future. As we know, the NEMT market is rapidly changing, and the more prepared everyone is, the better. Kris will lead the discussion on what value payments are and how they will impact both brokers and providers. Joe will address how we can all be prepared from a technology perspective. This is a session everyone will want to attend as this is where the market is headed from a payment perspective!"

We look forward to seeing you at NEMTAC! If you are looking for NEMT solutions that help you reach your highest potential, the experts at TripSpark are always happy to help. You can give them a call at +1 877-448-7237. Be the first to know about exciting updates by subscribing to their mailing list and following them on [Facebook](#), [Twitter](#), and [LinkedIn](#)!
