

Virtual Console Virtual-Events' Platform Attains Certification for GDPR Readiness

Singapore, Singapore, Sep 14, 2021 ([Issuewire.com](https://www.issuewire.com)) - Virtual Console, a leading company in the Events Tech space, announced today that its virtual and hybrid events SaaS platform has now attained GDPR Readiness, as certified by a leading Information Security audit agency. This capability allows Events Organizers, Events Agencies, Corporate customers, and other users of the platform absolute confidence in security of the Events data including Personally Identifiable Information (PII) relating to attendees, speakers, etc. – a rare amongst other platforms in the global market.

“Our team at Virtual Console was working painstakingly since the beginning of this year on ensuring the Events Data and Personal Information, relating to individual attendees and others participating or managing any virtual or hybrid event being conducted on the platform, was encrypted whether at rest or in motion as well as to reduce security-vulnerabilities to zero. At the same time, other data-security and privacy-related stipulations of General Data Protection Regulations (GDPR) were implemented in all of the other business and technology processes of the Company”, said Aqeel Ahmed, Co-Founder of Virtual Console. “We have a commitment to our customers to provide state-of-art information security and privacy for their Events Data and Personal Information while providing secure options for the transfer of the same data to them Post-Event.”

Virtual Console SaaS platform for virtual and hybrid events was commercially launched in January this year with futuristic features and has since garnered global Event Agencies, Corporate houses, Not-for-Profits, etc as its customers. Customers enjoy complete white-labeling for their events with look-and-feel and web domains of choice.

About Virtual Console

Virtual Console is a SaaS platform for conducting virtual and hybrid events and has been designed as a DIFY (Do It For You) one to help Events Managers and Corporate customers to conduct events without the need for any tech personnel on their side. The emphasis is on giving attendees an immersive experience so as to enhance the time they spend on the event/platform as well as benefitting the Event Organizers with analytics and generating sales leads to maximize ROI. Easy customizability and options to avail of professional services e.g. Content, Production, Show-running, etc. are offered. The platform is available in both Subscription as well as one-off Events pricing models.
