

WS Law Women's Clinic and Laparoscopic Surgery Centre: 4 Tips for Choosing the Right Gynaecologist for You

Singapore, Singapore, Sep 18, 2021 ([Issuewire.com](https://www.issuewire.com)) - WS Law Women's Clinic and Laparoscopic Surgery Centre, a trusted gynae clinic, shares essential tips for choosing a Good Gynaecologist in Singapore.

Whether it's because of pregnancy, health concerns, or general checkups, finding the right gynecologist can be challenging for many women, especially first-timers. Besides reputation, costs, and accessibility, several factors need to be considered when choosing the best gynecologist.

First of all, women need to know their reason for visiting a [Gynaecologist in Singapore](#). "There are so many gynae clinics in Singapore that offer specialized treatment. Understanding their reason for seeking help is an important step to narrow down their search," stated Ms. Janice, Nurse Manager at WS Law Women's Clinic.

Additionally, she said, "Different women require different care and treatment. For instance, women

experiencing complicated gynecology issues such as infertility or irregular periods need specialized treatment from trained professionals while women going for their annual checkups don't."

For this reason, finding the right gynae requires research. "It would be greatly beneficial if women can get referrals from their relatives and friends. In doing so, they not only get first-hand knowledge about other people's experiences but, more importantly, they can also rest assured that they're choosing a Gynaecologist in Singapore that's trusted by their network. If this is not available to them, they can always look for online reviews via GoogleMyBusiness and other forums to make a well-informed decision," explained Ms. Janice.

While doing research, they can decide if they want to follow the public or private route.

In Singapore, there are trained specialists in both the private and public sectors. In each case, there are also pros and cons to consider that might influence one's decisions.

According to Ms. Janice, "On the one hand, public clinics tend to have a longer waiting period than private clinics, but they also offer government subsidies. On the other hand, private clinics offer a more convenient appointment process and provide complementary services, but they're usually more expensive."

So, the only way for women to make the right decision is to weigh the implications and understand how each option can meet their needs and personal preferences. With that being said, doing prior research can help set women's expectations before visiting a specialist and prepare them for what's to come.

"Of course, different women have different experiences with their gynecologists. What works for some, may not work for others. Regardless, the most important thing is that they feel comfortable with the one they've chosen," said Ms. Janice.

Since gynecologists deal with women's intimate parts, women need to find someone they can trust wholeheartedly.
