

## **A new approach to Insurance Benefits & Design with launch of PA Files Consulting**

Top industry producer, Pam Files, turns the page on distinguished career to offer more innovative solutions for corporations and healthcare.

**Mississippi, Madison, Oct 20, 2021 ([IssueWire.com](http://IssueWire.com))** - PA Files Consulting is pleased to announce they are open for business as an independent consulting firm. The firm was founded by Pamela A. Files, a top industry performer with over four decades of experience for large brokerage firms. PA Files Consulting helps unravel ever-changing options facing clients by assisting them to turn the page on more advantageous solutions regarding their Insurance and Benefits design offerings.

"Insurance solutions today barely resemble conventional understanding of the industry, even a few short years ago," stated Pam Files on the challenges facing businesses today. "When making policy decisions, this lack of informed and inquisitive guidance can devastate an organization's bottom line, leaving it vulnerable and costing millions over the years."

Files is a leader in Employee Benefits Consulting for large and mid-Size Employers from corporations to manufacturing and healthcare. Through her new business, she consults as an independent corporate advisor and planner to review existing packages. An experienced broker and industry specialist, Files can analyze and implement improved policies or work alongside local and regional insurance agencies to bring national proposal expertise to the table.

"Using a seasoned Benefits Consultant offers a new approach for insurance solutions — real insider insight, benefits analysis, and latest trend design decisions," Files continued. "I'm excited to now be able to offer this national best-practices approach to companies across Mississippi and the Southeast and provide more effective, personal solutions to employee satisfaction and bottom-line profitability."

Twice voted one of the "Most Influential Women in Benefits Advising" ([2015](#) & [2017](#)) by Employee Benefits Adviser, Files is dedicated to uncovering missed opportunities for clients. She will also provide free guest speaking engagements to help associations and chambers be better informed.
