

CORALIS H2020 project dissemination event

Creation Of new value chain Relations through novel Approaches facilitating Long-term Industrial Symbiosis

CORALIS

Industrial Symbiosis
in Energy Intensive Industries

Belgium, Brussel, Oct 18, 2021 (Issuewire.com) - The 1st Dissemination Event of the [CORALIS project](#) was successfully held on **14th October 2021**. Industrial Symbiosis (IS) has gained great attention in the last few years due to its high potential for energy and resources savings. While initiatives around the concept of IS in Europe have already started being developed, there is still a need to take advantage of its full potential and facilitate a larger market uptake among EU industrial areas.

The event, which was moderated by Mr. Rod Janssen, President of Energy Efficiency in Industrial Processes and partner of CORALIS project, aimed to introduce the project's scope but also to hear from prominent speakers of the industry showcasing business models and finance cases.

CORALIS partners had the opportunity to introduce the CORALIS project's vision and share their perspectives and insights in relation to the development of the project's activities and results so far in the 3 Lighthouses areas (Spain, Sweden, and Italy).

In particular, the event's key speakers were:

- *Fillippo Gasparin* from **CINEA**, who presented the LIFE-2021-CET-VALUECHAIN programme
- *Isidoro Tapia* from the **European Investment Bank**, who discussed financing and business in the industrial symbiosis context
- *Christian Leroy* from **European Aluminium**, who provided industry insights of industrial symbiosis in practice
- *Karen Degouve* from **Natixis**, who talked about financing energy transition in the industry
- *Violeta Martin Gil* from **CIRCE**, who offered an outline of the CORALIS project and its activities
- *Francisca Paniagua* from **Fertiberia**, representing Spain's lighthouse, discussed their contribution to the project's targets
- *Thomas Parker*, from **WA3RM AB**, representing Sweden's lighthouse, discussed their business model for best sustainability impact
- *Riccardo Monaci* from **Confindustria Brescia**, representing Italy's lighthouse, discussed their

materials recovery activities

- and *Nick Chapman*, from **INCUBIS**, presenting the Energy Symbiosis Incubator collaboration project
