

EZsmarts Announces Launch of EZS Token Private Sale At 30% discount

Vaughan, Ontario Mar 4, 2022 ([IssueWire.com](https://www.issuewire.com)) - EZsmarts, an ed-tech platform with a digital currency, is today announcing the launch of the EZS token private sale at a 30% discount. This utility token enables clients to purchase services on the EZsmarts.com platform with ease.

The token was launched on February 22, 2022, by EZsmarts OÜ based in Estonia. The tokens provide crypto IDO and early-stage buyers, online tutors, and students with a unique opportunity to register and buy EZS tokens at a discount, which can be used for educational and tutoring services on EZsSmarts.com.

"The EZS token private sale provides a unique opportunity for crypto investors, educators, and students to register to buy EZS tokens at a 30% discount, while supplies last", said Baldo Minaudo, President of EZsmarts, Inc. "The EZsmarts.com platform is a grass-roots, project based on providing education-related services around the world. The platform provides a solid, use-case for the EZS utility token."

Those who register on EZsmarts.io will have a referral link to be shared with friends and on social media. They will earn a 20% referral reward for purchases resulting from their referral link. In addition, they will also be notified of the forthcoming March contest where they can win cash and prizes. The contest will be very simple to participate in and fun.

EZsmarts.com is a global ed-tech platform that provides its services in countries across seven continents. The platform's roots are in Canada, with plans of increased penetration into the U.S., U.K., Germany, Vietnam, Brazil, Indonesia, Australia, Pakistan and Nigeria, and other countries.

The platform offers knowledgeable individuals who are able and willing to teach and guide others with the opportunity to earn on the platform.

"Our platform is a peer-to-peer e-learning platform that allows those with knowledge and able to answer questions, teach or guide others in their learning to get paid via PayPal, credit card, or EZS tokens," Mr. Minaudo added.

The platform uses blockchain, artificial intelligence, and web 3.0 to match learners with educators, making learning easy, accessible, convenient, and effective for anyone, anywhere, and anytime.

EZsmarts.com and EZsmarts ed-tech platform are owned by EZsmarts, Inc. (Vaughan, Canada)

The EZS token is a utility token issued by EZsmarts OÜ (Tallinn, Estonia)
