Gujarat, Ahmedabad, Oct 8, 2021 ([Issuewire.com](https://www.issuewire.com)) - Gojek Clone app by V3Cube has gained its reputation for being the world's best on-demand multi-services app available for entrepreneurs to launch their business using. But the V3Cube team seems to be committed to making continuous advancements and prove this by adding new and unique features to benefit their clients' users and service providers.

The global patterns of doing business have shifted largely owing to the pandemic. Multiple new restrictions have been imposed by the governments of various countries in order to prevent the spread of the CoVid 19 pathogen. To make sure that the Gojek Clone app built by V3Cube not only proves to be a benefit to the users in a time of a crisis like this but also has all provisions needed to run a multiservice business smoothly, the app development team of V3Cube worked in cognizance with a research team in order to introduce a bunch of effective new features.

In terms of credibility and performance, V3Cube's Gojek Clone app, also known as the CubejekX 2021 is one of the most sought-after options in the market owing to its robust coding and multiple features. However, the new features have added a whole new dimension of multi-service ease to the app.

Among the most prominent new additions of the features are:

- **Restricting Provider's Fraud:** In order to make sure that service providers or delivery personnel can only be marked as 'Arrived' when the provider is within a fixed radius of distance from the location. This prevents fraudulent practices by the providers who claim to have arrived and then cancel the order even though they are a distance away.
- **Apple Watch app for taxi booking:** Keeping up with the times, this feature allows users to make taxi bookings right from their Apple watches or iWatch without having to rely only on their smartphones.

- **Cookie Consent Pop-Ups:** While this may seem like a minor addition, this is a very important feature that most other companies that offer Gojek Clone apps fail to include. The Cookie Consent Pop Up has been added throughout the system in accordance with GDPR and EU Cookie Directive.
- **Firestore for mobile verification:** Firestore authentication is a system that provides backend assistance in order to verify the phone numbers of the users. This prevents people from making fake profiles and dummy registrations.
- **SKU Code for Store Delivery Items:** Store-based delivery is a very important component of the on-demand multi-services platform like the Gojek Clone app. The SKU code is added within the system to ensure that restaurants or store owners can identify a specific item within their offered items.
- **Advanced Keyword Search for Service Providers:** In the service provider sections, the users can easily find, locate and hire service providers, based on the top keywords of the service and they don't have to scroll all the way to the bottom of the screen.
- **Location-wise promo code:** This feature allows app owners to promote specific products across specific locations.

V3Cube has been in the business of researching and developing on-demand mobile apps for almost a decade. With over 2000 live apps on the Google Play Store and iOS App Store launched by their team, they have established a reputation for being a force to be reckoned with in this industry.

Apart from the Gojek Clone app, V3Cube Technolabs LLP. also specialized in other on-demand apps such as [Uber Clone](#), Grab Clone, Postmates Clone, Zomato Clone, UberEats Clone, On-Demand Handyman App, On-Demand Car Wash App, On Demand Tow Truck Apps, and much more. They have a team of highly specialised, skilled, and experienced developers who build both Android as well as iOS apps for their clients.

The Gojek Clone app built by them offers over 70 different services encompassing On-demand Taxi Booking, On-Demand Parcel Delivery, On-Demand Store-Based delivery for restaurants, grocery stores, pharmacies, florists, etc., On-Demand Service Provider for hire which includes on-demand doctors, on-demand beauticians, on-demand tutor, on-demand plumber, on-demand electrician, on-demand dog walker, on-demand babysitter and many more, and, a new service called the Delivery Genie which essentially offers a pickup and drops service for any and all types of items from one place to another.

Widely acclaimed as the world's number one on-demand multi-services app, the [Gojek Clone](#) by V3Cube has become more robust, efficient, and profitable with the addition of new features.
