

# Harry Coumnas Spends Most of His Time Reading About Mars

This Press Release intends to inform the readers that Harry Coumnas spends most of his time reading about Mars.

**Indiana, Helmsburg, Oct 4, 2021 ([IssueWire.com](http://IssueWire.com))** - Aimed at saving the earth from aliens, **Harry Coumnas** loves to spend most of his time reading about Mars and whether life exists there or not. He points that the spacecraft that was sent to Mars has proven that life indeed exists there. Holding a strong scientific background and PhD in his field, he is the best fit for his job. He is concerned about avoiding biological contamination in human and robotic space exploration.

Holding a professional career in astronomy, he chooses to go out of space so that he can conduct experiments and research on various different projects. He is meticulously trained to conduct scientific research, as well as how to survive in various different environments. Besides conducting observations and research, Harry ensures the safety of their fellow crew members.

Pertaining to his role in planetary protection, **Harry Coumnas** works to assist in the construction of sterile spacecraft, the development of plans to protect Earth from returned extraterrestrial samples, and formulation and application of space policy as it applies to Planetary Protection.

## About Harry Coumnas

**Harry Coumnas** makes his efforts to explore more about space. He is well-versed with all the technologies that are developed to explore space, resulting in innovations that benefit everyday lives. He has all kinds of missions studying all kinds of phenomena, including earth science and exploring comets, neighboring planets, deep space, and much more.
