

Menu Design Group Releases New Turn Key Digital Menu Board Solutions

Easy to implement and set up, MDG digital menu boards allow restaurants to turn any TV into a digital menu with a Free 30-Day Trial.

Georgia, Atlanta, Oct 10, 2021 ([Issuewire.com](https://www.issuewire.com)) - Menu Design Group (MDG) announces the immediate availability of newly enhanced all-in-one [digital menu board systems](#). Specially designed for easy 1,2,3 set up, MDGs turnkey digital menus allow restaurants of any size to transform any TV into revenue-generating digital menu board solution.

"Using your computer and our specially designed digital menu board software, restaurants can now easily create their menu and send it to their TV," said Phil DiMarco from MDG. "Easily upload your menu, add eye-catching video food promotions, and upsell your highest margin items. If you need menu design and set up services, we offer turnkey options that get restaurants an out of the box, plug and play digital menu board."

A Digital Menu Board Suite of Tools

When it comes to creating and setting up your digital menu board, MDGs [digital menu board software](#) comes with all of the tools you need to set up your menu with:

- Digital menu board template library

- 4K and HD stock food images, videos, and clipart
- Instantly import your menu from CANVA or PosterMyWall
- Easily add or remove menu items
- Set promotional advertisements to rotate through
- Include scrolling tickets of deals and specials
- Feature your restaurants Instagram or Twitter updates

Remotely Manage

MDGs digital menu board software is cloud-based, giving users the ability to design and manage their digital menu boards from any computer at any time. All of the changes made on the computer will wirelessly be sent to the menu tvs. In addition to instant updates, users can preschedule their menus for dayparting.

Custom Designed

Because restaurants specialize in food, not technology, MDF offers digital menu systems that include initial digital menu design and set-up for plug-and-play use. The restaurant can log in to MDGs digital menu software from their computer and type in the menu updates when making updates. All edits will automatically be sent to the TVs.

About the Menu Design Group

For over ten years, the Menu Design Group has designed effective and reliable digital menu board systems. As a result, MDG has complete, easy-to-use solutions for restaurants looking for dedicated digital menu boards from [pizzerias digital menu boards](#) to [cafe digital menus](#).
