

POPS Kids Learn: The solution to equip children with knowledge for the back-to-school season online

Vietnam, Thanh Pho Ho Chi Minh, Oct 7, 2021 ([Issuewire.com](https://www.issuewire.com)) - POPS Kids Learn has just launched an online geometry program for children nationwide, with 1,000 trial lessons for children to enjoy learning and get used to online learning in the new school year.

Different from every year, this year students across the country will have an online back-to-school season. Groups of elementary and middle school children will start learning all subjects at home through the online form. With the new learning method, most parents are concerned about their children's ability to acquire knowledge when learning remotely. To introduce children to online courses in a more intuitive and lively way, POPS Kids has just launched [POPS Kids Learn](https://www.popskids.vn) - An online interactive educational platform for children.

Coming to the "online school", children will be able to participate in classes from formal classes to skills training courses with a team of leading teachers in a variety of fields. Each class consists of a maximum of 10-20 students according to the appropriate age, guided by foreign teachers, highly qualified Vietnamese teachers from prestigious educational centers such as Everest Education, Creative Learners Teky technology...

In addition to classroom hours, POPS Kids Learn provides children with knowledge, skills, and entertainment on the same platform. Unlike formal classes, each course includes many lectures based on advanced learning methods and direct interaction with the teacher at home. With a team of excellent teachers nationwide, POPS Kids Learn brings a series of modern learning materials

With outstanding features that will be developed soon, POPS Kids Learn creates an extremely convenient user experience. Parents can track their child's learning progress through Online Learning Reports, update "hot" educational information from Blog - A community dedicated to parents, where parenting experiences can be shared. teaching and educating children, as well as evaluating and referring other parents to courses.

Along with a larger goal, POPS Kids Learn aspires to become an educational platform that adds more knowledge and skills to children across the country, besides school hours. As well as helping parents to feel secure for their children to study and entertain safely and with full convenience during the current epidemic. In particular, 1,000 trial lessons for only 1,000 VND will be a special gift for children who study online at POPS Kids Learn during the opening season.

In August, a series of interactive online courses with diverse knowledge and skills will be launched on the POPS Kids website. Parents can choose courses suitable for their child's ability, age, and knowledge. Coming to Teky Institute of Technology's courses, your child will not only be provided with practical knowledge about STEM, 2D, and 3D games but also equipped with necessary skills in the digital age with classes. such as Digi Girl: STEM Art, Baby programming 3D games with Tynker, Minecraft, Makecode...

In addition, children will be familiar with thinking subjects from a young age and build a solid knowledge base for later. Everest Education's curriculum always makes parents satisfied with Mathematical logic classes for children from grades 1 to 5. Courses in painting, dance, math, science, and society will continue to launch users shortly.
