

RAKwireless Launches New Company MNTD.

RAKwireless Launches New Company to Bring Crypto Mining to More Individuals and Accelerate Growth of Helium's Peer-to-Peer LoRaWAN Network

Guangdong, Shenzhen, Oct 5, 2021 ([Issuewire.com](https://www.issuewire.com)) - [RAKwireless Technology Co., Ltd. \(RAK\)](#) a pioneer in wireless end-to-end solutions and IoT technology, announces today the launch of its new company, MNTD. (pronounced as minted), a crypto-hardware company providing easy-to-use mining products to consumers.

The launch includes two new miners, one limited edition Goldspot Miner and the flagship MNTD. Miner. The new Goldspot Miner will feature VIP customer support and focus on providing an exceptional consumer experience and customer satisfaction. This launch serves as a testament to RAK's commitment to the People's Network and passion to make mining accessible for everyone.

MNTD and its products stem from the response to the massive demand for miners. MNTD. and RAK is planning to expedite shipments to crypto enthusiasts throughout the world. Due to feedback from our community, the newest launch will not accept pre-orders and will now go live and ship right away to customers. Interested customers can check on inventory using the live inventory tracker available on the website.

Despite a year of record chip shortages and setbacks, RAK has successfully supplied 60,000 units in the last few months to members of The People's Network. The brand is on track to supply many more throughout the rest of the year.

"We view the launch of the Limited Edition Goldspot Miner to be a testament to our ongoing mission in liaison with Helium; a partnership that has allowed us to build simple, secure, and scalable solutions to help build and expand The People's Network," says **RAKwireless CEO, Ken Yu**. "We unequivocally recognize the power this product has been able to provide to IoT and crypto enthusiasts across the world. With MNTD, we want to cater to the demands of the public with an introductory interest in crypto, we want consumers to look forward to having the limited edition miner, in-stock, and ready-to-ship as quickly as possible."

Last month, Helium secured \$111 [million in a token sale led by Andreessen Horowitz](#). The decentralized peer-to-peer 5G wireless network is built from the Internet of Things (IoT) using blockchain technology. Donned "The People's Network," miner hotspot Helium enthusiasts users buy the equipment and host it at home to be able to mine crypto and access the network. It's a quick 'plug and play' process, the whole experience of setting up a miner is possible in under 20 mins. The product is coupled around a modern reward system built around a kind of cryptocurrency, the [Helium Token](#) (HNT) that users can effectively mine for. Since 2020, RAK has been a key partner to Helium in creating reliable and top-class hardware to power Helium Hotspots.

About RAKwireless

RAKwireless is a multinational technology company established in June 2014. Headquartered in Shenzhen, RAK is changing the IoT landscape by eliminating design complexity and accelerating time-to-market, for underserved and emerging markets, including open-source and industrial communities. Creating easy-to-deploy solutions and modular IoT products, RAKwireless is working to grow a community of system integrators, developers, and IoT solution providers, who are passionate about taking IoT solutions further than ever before.

About MNTD.

MNTD. is on a mission to democratize cryptocurrency-related hardware & mining for the everyday person (#ThePeople) that want to earn rewards, but haven't learned or desire to learn the technical complexities often required to operate them. www.getmntd.com

About Helium

Since launching in 2013, Helium has become a vibrant community of developers and citizens who are part of building The People's Network and earning \$HNT in exchange. Co-founded by Shawn Fanning and Amir Haleem in 2013, the company makes it possible for brands to get wireless coverage for low-power IoT devices at a fraction of the cost of cellular. The network is live in North America and Europe. Live in 1,800 cities throughout North America and Europe, The network is soon coming to Asia. For more information, visit: <https://www.helium.com>
