

Seagence is Realtime Defect Monitoring and Root Cause Automation

Telangana, Hyderabad, Oct 21, 2021 ([Issuewire.com](https://www.issuewire.com)) - [Seagence](https://seagence.com/) is Realtime Defect Monitoring and Root Cause Automation

Using Seagence's unique Execution Path technology combined with machine learning, receive real-time alerts with root cause when defects occur in your production Java applications. Fix your code without needing any debugging

How Seagence Works?

Attach a tiny java agent

Attach a lightweight runtime java agent when you start your application.

Give Seagence 24 hours

As your users access the application, [Seagence agent](#) collects data about how requests are being processed. So give Seagence 24 hours to collect enough samples for Analysis.

Receive alerts when defects occur

The collected data is fed to Seagence's Analytics engine in real-time which finds defects when they occur and alerts. Know that Seagence unearths all defects in your application including unknown.

Fix broken code

With Seagence provided [defect](#) and root cause in hand, you fix your broken code.
