

Sukhayu Ayurved Offers the Most effective Ayurvedic Treatment for Avascular Necrosis

India, Rajasthan, Oct 10, 2021 ([Issuewire.com](https://www.issuewire.com)) - Sukhayu Ayurved is offering treatment for Avascular Necrosis, a disease where the bone starts dying because vasculature within the bone is not able to carry blood to the bone. This was a rare disease earlier, which became common in modern times. There are two causes for this; abuse of alcohol and use of steroids. The research for the treatment has been carried out under the expertise of Vaidya Dr. Pardeep Sharma M.D. (Ayurveda) at Sukhayu Ayurved, Jaipur.

Avascular necrosis is a disease of blood arteries, which impacts the bones and leads to bone death. This affects most commonly the hip joint but can occur to any other joints of the body as well. The blood supply is stopped because of many conditions, out of which alcohol and steroids are the most common external causes. This condition can also occur because of other underlying diseases like Systemic Lupus Erythematosus (SLE). Patients who were given steroids for COVID-19 treatment are also coming in greater numbers with complaints of Avascular Necrosis. The conventional system of medicines does not work on the root cause of the problem, thus experts advise for the replacement of the joints. But surgery is not a solution. A patient who replaced some joint can be prone to Avascular Necrosis in other joints too as surgery does not work on this possibility. So, it is always advisable to [avoid joint replacement in the case of AVN with Ayurveda](#).

At Sukhayu Ayurved, they work on the root cause of the problem therefore Ayurveda solves the problem from the root and a patient gets rid of not only the pain, limping but also [Ayurveda treatment of AVN without surgery](#) makes sure that disease will not spread to the other joints. Ayurvedic cure for AVN stops the progress of the disease by ensuring the proper blood supply to the affected joint. This is possible because Ayurveda resumes blood supply. Every part of the human body, even the dying bones has capacities of life. There are stem cells in everyone. These cells have the capabilities to develop into a bone, not associated with age. Once this blockage with blood vessels is opened, it allows the blood supply to these cells and this helps in the treatment of Avascular necrosis.

Symptoms of Avascular necrosis vary according to the involved bone. But the worst part is that there are no early signs and symptoms of this disease. Symptoms become visible after the disease progresses in advanced conditions. One may feel pain when they press, strain, or use the affected bone. With time, this pain gets more and more complicated. The biggest confusion in the case of AVN is it takes time to get diagnosed and the wrong diagnosis can lead to more complicated stages. There are two sets of symptoms of Avascular necrosis; common symptoms and specific symptoms according to the location of the pain.

[Ayurvedic Medicines for Avascular Necrosis](#) prepared under the expertise of Vaidya Dr. Pardeep Sharma are known to help patients with Avascular Necrosis, a condition that hinders blood supply in bones and causes bone tissue death due to a lack of nutrients from nearby blood vessels. These medicines contain ingredients derived from the ancient Ayurveda system which has been used for over 5000 years as a part of treatment for various ailments including AVN by Indian physicians before modern medicine became available and undoubtedly, can provide significant benefits. The main approach in treatment for Avascular Necrosis mainly involves four steps:

- To stop the further degeneration of the bone
- Working on opening the passage of blood
- To ensure proper blood supply to the affected bone
- To “regrow” the bone- if possible

Age and other factors are involved in the last point.

Sukhayu Ayurved is the only place under the expertise of Vaidya Dr. Pardeep Sharma M.D. (Ayurveda) where they have pieces of evidence with MRI findings for reversal of the AVascular Necrosis.
