

2nd Edition of International Conference on Materials Science And Engineering

Materials 2022

Singapore, Singapore Nov 26, 2021 ([Issuewire.com](https://www.issuewire.com)) - After achieving resounding success in our previous conference, we have colossal delight in inviting you to our “[2nd Edition of International Conference on Materials Science and Engineering](#)” [Materials 2022](#) which is a **HYBRID EVENT** scheduled on **March 28-30, 2022** at **Singapore**.

The conference deliberations will be on the theme “***Sustainable Thriving in a Material Hungry World.***”

[Materials research](#) and manufacturing technology innovations are important indicators of the modern high-tech revolution. The International Conference on Materials Science and Engineering is focused solely on the development and characterization of novel materials and the latest production process trends. This prestigious [Materials conference](#) will gather industry experts, academicians, material scientists, and researchers of matching interests from across the national and international countries, through panels and lectures, plenary sessions, oral papers, and poster presentations, to share their research experiences and research efforts. [Materials and engineering conferences](#) are meetings known in the field of materials science for the dissemination of knowledge, the exchange of research ideas of specific methodologies and subjects. Our experienced [Materials honorary speakers](#) will present you with the latest information, and you will become more educated and energetic than you possibly imagined.
