

Aireagóir Launches Program to Help Startups

Your Secure Cloud Partner

Nevada, Las Vegas, Nov 2, 2021 ([Issuewire.com](https://www.issuewire.com)) - Aireagóir, a software provider that helps companies build scalable sales and marketing processes, announced today the launch of their **Aireagóir for Startups Program**. The new program provides premium sales and marketing solutions at a deep discount for qualifying startups. It also offers VCs, incubators, and university startup programs an opportunity to provide more value to their portfolio of companies.

“We have a special place in our hearts for startups,” says Grady Johnston, CEO of Aireagóir. “Not that long ago we were in the same position, and we remember how challenging it could be at times. As a startup, you tend to take a tunnel vision-focused approach to your business. For most companies the architecture, costs, and security of IT are not really in view, they are obsessing over their sales opportunities and product development. As is necessary, until an issue hits then the world pulls them back. They do not look at the long-term plan of keeping operational costs down to enable focused growth. Our platform alleviates pressure on startups and gives them a foundation, as well as a head start on building product offerings and securing their infrastructure. Over the years, we have successfully built first-class solutions that accelerate growth, product development, and we’ve grown our business rapidly by using our offering. Now’s the time for us to ‘give back’ to those in a similar position.”

Startups often struggle with taking their businesses to the next level of growth. Aireagóir designed their Startups Program for companies that need a helping hand as it relates to customer growth and retention. The program includes an array of cloud offerings and partner solutions coupled with free education and world-class support.

What's more, Aireagóir 's discounts are far deeper than comparable programs. An investment in Aireagóir 's Startup Program is 50% less than big-name competitors, such as AWS. Discounts are valid through the 2nd and 3rd years as well, which is 50% longer than competing plans, like AWS.

Solutions in this program start with the (DRaaS), Infrastructure as a Service (IaaS), Kubernetes support, training, and more. Aireagóir 's goal is to become a startup's foundation to allow them to focus on what they have to offer.

Aireagóir offers its solutions based on client feedback, and from the needs of their own startup challenges. The company was founded in 2018 and has continued to be privately funded throughout the lifetime of its existence. Aireagóir has everything from the ground up – giving startups one ideal platform to build and scale their infrastructure and operations.
