

Anthony Raspa is Currently Working as General Manager at Dezin Digital

This Press Release is written to inform the readers that Anthony Raspa is currently working as General Manager at Dezin Digital.

Perth, Western Australia Nov 25, 2021 ([IssueWire.com](https://www.issuewire.com)) - Formerly working as Transition Manager at Fujitsu, [Anthony Raspa](#) drove the design and delivery of major transition projects for Government Departments and Enterprise, as well as infrastructure and other works for clients in the mining industry, including business continuity, disaster recovery, IT risk management, and change management. He optimized project outcomes through sound solution design, full program and project documentation, contract deliverables, and stakeholder engagement.

Pertaining to his role as a former program manager at Horizon Power, he worked for the successful leadership of the management and delivery of technology during a strategic restructure and heavy stakeholder change. Besides, he managed a diverse team and led the development of a long-term vision for Programs, Projects, Business Intelligence, Service Delivery, and Technology across the organization.

Currently, **Anthony Raspa** is working as General Manager at Dezin Digital, Anthony previously worked at IMDEX as program manager. Here, he manages a diverse portfolio of projects from Drilling Optimisation, Downhole Navigation, Structural Geology, In Field Geoanalysis, Driller Operable Geophysics and their Cloud and Android applications to support these products. He defines strategy and designs strategic roadmaps for infrastructure to become a leader in the energy utility industry.

About Anthony Raspa

Anthony Raspa is currently studying Master of Business Administration at the Australian Institute of Business. He completed his Masters in IT, PMP, Prince2, Agile Program, Project Manager, Microsoft Certified System Engineer.
