

Best Workforce Management Software in USA | HourDay | Top Workforce Management Software USA

HourDay is a Cloud based SaaS system with integrated modules to manage projects and avoid profit leakages for any enterprise size.

Middlesex, New Jersey Nov 24, 2021 (Issuewire.com) - Cloud-based SaaS system with integrated modules to manage projects and avoid profit leakages for any enterprise size.

1) Project Management.

- 2) Workforce Requirement, Recruitment, ATS, Visa Processing, On-Boarding.
- 3) Time Sheets & Expenses.
- 4) Invoicing & Tracking
- 5) Vendor, Commission Management
- 6) Dashboard driven analytics & reporting

ITS/ITES companies and practically any company that needs to track timesheets & expenses. HourDay offers much more through its integrated modules like ATS, Vendor management, Commission management, Project Budget management, Invoice management, Visa Process management.

Other applications in a similar market are both too large and expensive, (meant for huge corporates – products like Workday, etc) – or too simple that cater only to timesheet entry, approval, and maintenance.

HourDay is a comprehensive and yet affordable solution that is scalable and robust.

HourDay offers APIs to integrate with Service Management Applications (Downstream systems for example User Management in Active Directory).
