

CodeHand - worldwide initiative to provide free education in Computer Science and Maths

Hertfordshire, United Kingdom Nov 7, 2021 ([IssueWire.com](https://www.issuewire.com)) - CodeHand (CodeHand.org) is a social enterprise based in the UK. The founder of CodeHand, Jatin, is passionate to share his knowledge and expertise in Computer Science and Maths and leverage his network of professional connections to educate disadvantaged children.

The mission of CodeHand is to provide free high-quality education to those who have limited learning resources and mentor the school students. The focus of teaching is on Maths, Coding, Artificial Intelligence, Machine Learning, and Robotics, all through Zoom. Informative blogs are also posted regularly on the website to support student learning.

CodeHand has formed a network of over 25 technology experts, to maximise the sharing of technical knowledge and to provide individuals with the education to positively improve their lives.

The CodeHand team is also interested in collaborating with non-profit organisations around the globe and would like to hear from those interested in getting virtually involved with activities in CodeHand.
