

Crown and Roots Dental Clinic Launches a Single Tooth Implant Service

Crown and Roots Dental Clinic releases a single tooth implant service. It helps people who need to implant their teeth in Delhi.

New Delhi, Delhi Dec 1, 2021 ([Issuewire.com](https://www.issuewire.com)) - Crown and Roots Dental Clinic, one of the trusted dental clinics in New Delhi launched a single tooth implant service. The idea of releasing this service is to ensure that people who lose their teeth can keep their bone quality. It also keeps them confident if they have to smile in front of others. The specialist at this dental clinic explained, *"Doing a single tooth implant service is serious work. Patients need to find the [best dentist in Delhi](#) to prevent any serious side effects. This procedure can also keep the quality of the jawbone by giving stimulation as usual."*

Some people may be unfamiliar with the dental implant procedure. That's why they have to get more information about it before doing the procedure. Let say a first-time patient should know what the dentists are about to do during the procedure and the [dental implant cost in Delhi](#). The specialist added, *"The good thing about taking dental implants is that patients can go home on the same day. The process only takes around 45 to 60 minutes. Then, patients can get the same chewing efficiency as natural teeth. The cost may be a bit expensive, yet it works well in the long term. On the other hand, patients can compare the cost of this procedure in Delhi and other countries. The cost of tooth implant in Delhi is more affordable than other countries."*

The reason why this service is so expensive is because of the longevity and advantages patients get. Patients don't have to go to the clinic once they want to take a single tooth implant service. Nowadays, they can use an e-consultation or an online appointment service before meeting with the dentists. They can even learn about the [single tooth implant cost in Delhi](#) to prepare the budget. A well-prepared procedure will boost the positive impacts of the tooth implant. The manager of the clinic stated, *"Patients will meet one of two specialists, namely Dr. Kartik Datta or Dr. Mansi Datta. They will decide the best treatment and procedure a patient should do. Before that, patients can take an online consultation and appointment. The process will be more effective. It also works well during Covid-19 where people can't meet each other too often as before."*

The specialists in this dental clinic hope that Crown and Roots dental clinic becomes one of the leading clinics on the single-tooth implant service. As a result, people know where to go if they need to implant a tooth in Delhi.
