

Fixoid Offers Computer and Phone Repair in Portland, OR and Vancouver, WA

Portland, Oregon Dec 1, 2021 ([Issuewire.com](https://www.issuewire.com)) - [Fixoid](#) is the #1 computer and cell phone repair service provider in the Portland metro area and Vancouver, WA. They've helped thousands of individuals and small businesses bring their broken gadgets back to life. Fixoid takes pride in providing affordable, quick, and professional repair with only the highest quality parts.

Since 2001, Fixoid's team of professionals has been helping, guiding, and solving all types of technical challenges. Here are some of the services they offer.

Computer Repair

They handle many hardware and software computer challenges.

Is your computer infected with a virus? Running slow, not charging, or was accidentally damaged? Fixoid's technicians handle issues like these days and can get your computer working like new again.

One common issue they regularly fix is a computer that is running slow or crashing. Often this is due to virus infection or malware. Their trained technicians know how to recognize and handle all types of malware and can restore your computer to optimal performance quickly and efficiently!

Failing hard drives is another frequent problem the Fixoids team encounters. The hard drive stores all your important data and can often quit working unexpectedly, without warning. If you notice any unusual clicking noises, sluggish performance, or corrupted data, don't delay - bring it in for service as soon as possible. Their technicians will always put their best effort to save your data and get your computer working like new again. Ask about a popular upgrade option to a Solid State Drive (SSD) that will eliminate many of the common failures old school hard drives suffer. Plus, an SSD boosts your computer speed up to 6 times!

Maybe you need a new AC adapter or a battery? Fixoid can replace batteries, charging ports, and chargers, which will extend the life of your device, saving you money and hassle in the long run.

Whatever problem your computer may have, you can count on their team to diagnose your laptop, desktop, or Mac computer and provide you with a cost-effective and professional solution.

Phone Repair

Our phones have become a part of us, so when our phone breaks it's almost impossible to get by without it. Fixoid understands the frustration. That is why they offer same-day repair on most smartphones, often while you wait.

If you have a cracked screen, bad battery, or a phone not that is not charging, it has never been easier to get your phone fixed. Stop by either of their locations, where they have technicians on standby ready to work on your phone immediately.

Did you drop your phone in the pool? If there has been any type of water damage, Fixoid recommends turning off your phone and bringing it into them ASAP. Don't attempt to charge it as it may permanently

damage your device. The sooner you can bring it in the more likely they can save the phone from permanent corrosion and damage.

If your phone is experiencing other problems like freezing, crashing, an iPhone stuck in a boot loop, or not turning on, their technicians can diagnose the problem and offer an affordable solution.

Their vast experience ensures you are getting the best and most qualified repair for your device, whether you have an iPhone, Samsung, google pixel, LG, or any other phone model.

Fixoid's goal is to help customers with all their technical needs, save money, and prevent gadgets from going into a landfill.

No appointments are necessary, but it can be helpful to schedule one to get immediate service in your desired time slot.
